# *Introduction*

*To the Chairman and Members  
of the County Health Committee.*

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present my Annual Report on the health of the administrative county of Cheshire for the year 1957.

At mid-1957 the county's population was 861,800, an increase of 11,400 over the previous year. The birth rate was higher and both the death rate and the still-birth rate lower than in the previous year.

It is always a pleasure to draw attention to some outstandingly satisfactory items in the year's vital statistics, and 1957 showed the infantile mortality rate to be 18.8 per 1,000 live ~~and still~~ births, the first time that this figure had ever been below 20 and a diminution of 3.7 from the previous year which was then the lowest figure on record for the county. The death rate of babies under one month was also the lowest ever attained. Having regard to the progressive improvements attained year by year in these two very important matters it is always disquieting to note that the still-birth rate, although substantially lower than its level of 13 years ago and previously, has remained approximately the same since 1948.

By the end of 1957 approximately 20% of the children born between 1943 and 1957, and thus eligible under the scheme, had been vaccinated against poliomyelitis. At the time of writing this report it is estimated that approximately 50% of those children eligible have received two injections, 9,300 have received one injection only, and 17,500 are registered and awaiting their turn, a very satisfactory state of affairs for which credit is due to the Divisional Medical Officers and those family doctors who have co-operated in making this scheme a success. The proportion of those parents who insist on British manufactured vaccine and are prepared to wait for it is lessening.

In the spring of the current year an outbreak of smallpox occurred in Bebington, which was dealt with strenuously and efficiently by the Borough Medical Officer of Health. The advantage of the system whereby the Medical Officer of Health for a County District is also Divisional Medical Officer for the County and a member of a large team of health workers was shown by his being able immediately to call upon Medical Officers and Health Visitors from the two adjoining divisions in his successful efforts to prevent the spread of infection.

Both the number of notifications of tuberculosis and the number of deaths from the pulmonary form of the disease were lower than ever before. This experience is common all over the country and is the result of early diagnosis, new and more efficient means of treatment, and, so far as preventive measures are concerned, contact tracing,

improved housing, B.C.G. vaccinations and the efforts of doctors and Health Visitors to see that patients are capable of preventing the spread of their infection to others. As was noted in the previous annual report the County Council's rehabilitation centre at Wrenbury has suffered a dramatic decrease in the number of trainees admitted. The feasibility of making use of Wrenbury within the field of mental health, whilst retaining the tuberculous colonists, to many of whom Wrenbury is home, has been closely examined, and it is considered that, with support from the Ministries of Health and of Labour, such a project should be both useful and practicable.

Considerably more visits to Cheshire were paid by the Regional Hospitals Boards' mass miniature Radiography teams than in previous years; the results of these X-ray examinations are given in tabular form in section V of this report.

Special reference has been made in previous years' Annual Reports to the high proportion of male deaths amongst persons dying in later middle age, *i.e.* between the ages of 45 and 64. In 1957 the proportion was higher than in any previous year and the ratio of deaths of males to females between these ages was as high as 169 to 100. The largest single cause of death amongst males in this age group was coronary thrombosis which is recognised as a public health problem of the greatest magnitude. The decision of the County Health Committee to investigate this problem has been implemented by the secondment (part-time) of four of the staff to visit the homes of the surviving relatives of persons who have died from coronary thrombosis between 45 and 65 years of age, and obtain answers to a questionnaire compiled after consultation with officers of the Ministry of Health and the Medical Research Council. The questions deal with many facets of living and working conditions, diet, leisure habits and activities. For each enquiry regarding a person who has died, a precisely similar one is carried out from a person of the same age group whose name has been chosen at random and by comparison between the particulars obtained from these two sets of people, it is hoped that some light will be thrown upon those aspects of daily life which predispose to sudden death from coronary disease. It is most gratifying to report that those persons who have been asked to help have been most co-operative. My thanks are particularly due to the County Treasurer and to the Clerk to the Cheshire Executive Council for their very valuable and indispensable help.

Deaths from cancer of the lung and bronchus are still mounting. This is another disease, commonest in late middle life, to which men are far more liable than women; during 1947 more than 7 times as many men died from this cause between 45 and 64 years of age as women. Health education towards the prevention and early recognition of lung cancer has been entrusted by the County Health Committee to the Manchester Committee on Cancer, so far as that part of Cheshire

which is within the area of the Manchester Regional Hospital Board is concerned. An exploratory meeting has been held regarding the setting up of a similar body for West Cheshire, based on Merseyside.

The Consultant Ante-Natal Clinics continued to be well attended; additional midwives clinics were commenced at Macclesfield and Marple. New "preparation classes" for expectant mothers at which physiotherapists attend to conduct "relaxation" exercises were set up at Crewe, Macclesfield, Marple, Nantwich and Winsford. Although the number of expectant mothers receiving dental care at County clinics was somewhat greater than in previous years, the proportion is still low and it is felt that more use could be made of this very useful service.

Although over a million articles were distributed through the Welfare Foods Service, only 30,000 less than in 1956, 16% fewer tins of National Dried Milk were sold, the deficiency being partially made up by orange juice sales. The majority of the selling centres, including virtually all those in the villages, are managed by voluntary helpers. Voluntary Committees of ladies again gave indispensable help at Child Welfare Centres, and I am glad to take this opportunity of thanking those ladies who regularly and willingly give their leisure time at the Child Welfare and Foods Distribution centres.

New Child Welfare Centres were set up at Bunbury, Christleton, Lacey Green (Wilmslow) and Leftwich (Northwich).

Handicapped infants and children under school age are now the special province of the Senior Assistant Medical Officer. The work of the "cerebral palsy" team has continued; each spastic child attending these clinics represents months and years of careful treatment, and it is particularly gratifying to report that seven spastic children have so far been able to attend a day school who would have been unfit to do so were it not for treatment at the county clinics. Help has been given to the three clinics for spastics organised by local voluntary committees under the National Spastics Society, and financial assistance is given in respect of spastic children who are also mentally defective and but for their physical handicap would be attending a County occupation centre. Special furniture for the use of Spastics is made at Wrenbury Hall Industries and made available in the homes of spastic children as part of the "after-care" scheme under S.28 of the National Health Service Act. In particular, a special fully adjustable chair for spastics has been evolved at Wrenbury from the specification prepared by the County "cerebral palsy" team which is in use in many homes.

In the field of mental health it is pleasing to note a slight reduction in the number of admissions to the mental hospitals in the County. The policy has been declared by the County Health Committee of providing at occupation centres accommodation for adults and children under the age of five. At the present time, the occupation centres

already in operation provide training for mentally defective children of school age. Through this provision supplemented by arrangements made with neighbouring County Boroughs, the only inadmissible children who are suitable to attend a centre and do not have the opportunity to do so are those who live in localities so isolated that they cannot reasonably be transported. Whenever possible the informal procedure is now adopted when mental defectives are admitted to mental deficiency hospitals.

In pursuance of the policy of introducing radio control of the ambulance service and placing it under central control, a County Ambulance Officer has been appointed.

The experiment of appointing a supervisor of Domestic Helps in the North-Eastern portion of the County proved so successful that four additional similar appointments have been made.

A valuable addition to the Domestic Help scheme has been the collection of foul washing for laundering at Hospitals where the necessary machines are available. The co-operation of those Hospitals which carry out the actual laundering is greatly appreciated.

Recruitment of home nurses and midwives, particularly in rural areas is becoming increasingly difficult. For the present, by the increased use of part-time personnel as relief nurses the problem is being surmounted in the towns, but this is not always possible in the villages and some home nurses are necessarily being required to work in larger districts than is desirable.

For the first time, information is given about the "meals on wheels" services provided to aged and handicapped persons by the Women's Voluntary Services. This work is being gradually extended to many parts of the County, it is entirely voluntary, and is greatly appreciated by the recipients. Although it is not a County service it plays a great part in enabling elderly people to remain in their own homes and I must express my own appreciation of the time and energy expended by the voluntary workers in this most useful activity.

This report contains the last contribution made by Mr. Stacey Hallard, Chief Inspector of Weights and Measures, whose death took place in September of this year. I wish to pay tribute to his willing co-operation over many years, and to his most helpful attitude on every occasion when his assistance was called upon.

The section dealing with work under the Food and Drugs Act shows satisfactory results in the routine testing of milks from pasteurising and sterilising plants. The use of the unofficial Asheaffenburg test as well as the official Kay Graham test enables the County Laboratory to report the same day to the pasteuriser any sample which has failed to satisfy the test. Samples of school milk are also regularly taken and the results of tests are considered to be satisfactory. The routine testing of empty milk bottles for a bacterial count has resulted in a considerable

improvement in their cleanliness. Full details of all results whether satisfactory or not, of tests are sent to the firms concerned without delay and this practice, together with frequent sampling and visitation is considered to be a main factor in maintaining the low proportion of sample failures.

Cheshire accepted the invitation of the Director of the National Birthday Trust Fund to partake in the country-wide "perinatal" survey in March of this year when detailed particulars of 293 confinements were compiled and sent to the headquarters of the Fund. Courses of instruction were held for Health Visitors on problem children, and for home nurses on lifting techniques. 55 midwives attended refresher courses in various parts of the country.

Regular meetings were held at County Hall with Divisional Medical Officers, at which matters of mutual interest, new developments and ideas were freely discussed.

My grateful thanks are due to the Chairman and members of the County Health Committee for their help throughout the year, as well as to the Clerk of the County Council and all heads of departments for their unfailing co-operation.

Lastly I acknowledge with deep gratitude the loyalty and friendship which I have received at all times from the members, professional and lay, of the County Health Department.

I beg to remain,

Your obedient servant,

ARNOLD BROWN

October, 1958.

## CENTRAL OFFICE

County Hall, Chester (Tel. Chester 24678)

**REPORT OF THE**  
**County Medical Officer of Health**

For the Year ended December 31st, 1957

---

**Section I.-Area and Population**

---

**Area**

The acreage of the County at the end of 1957 was 621,825 acres.

**Population**

The population of the Administrative County, as constituted 1/4/57 and enumerated at the Census of 1951, was 815,884. The estimate of the Registrar-General for mid-1957 was 861,800.

**Rateable Value**

The rateable value of the Administrative County of Cheshire for General County Rate purposes at 1/4/57 was £9,814,345. A penny rate over the whole County for 1957-58 represented the sum of £39,530 (estimated.)

**Health Service Premises**

No major works were commenced or completed in the above year, but many minor adaptations and improvements have been carried out at various buildings, and the normal programme of maintenance work has continued. A few additional pre-fabricated garages have been erected at Nurses' houses.

## Section II.-Births and Deaths

---

The figures are for the Administrative County, 1957, unless otherwise stated.

### Live Births :—

	Total.	Male	Female
Legitimate	— 13055	6652	6403
Illegitimate	— 419	218	201

Birth Rate per 1,000 of the estimated resident population, 15.6.

	Total.	Male	Female
Stillbirths	— 314	163	151

Stillbirths Rate per 1,000 total (live and still) births, 22.8.

	Total.	Male	Female
Deaths	— 10251	5175	5076

Death Rate per 1,000 of population, 11.9.

The principal causes of death were as follows:—

Disease.	No. of Deaths.	Rate per million population.
Heart Disease	3359	3898
Malignant Diseases	1752	2033
Vascular lesions of nervous system	1665	1932
Pneumonia	385	447
Tuberculosis (all forms)	83	96
Pulmonary	72	83
Non-Pulmonary	11	13
Nephritis	90	104
Bronchitis	459	533
Ulcer of Stomach and Duodenum	88	102

The deaths from the chief zymotic diseases were as follows :

Disease.	No. of Deaths.	Rate per million population.
Diphtheria	—	—
Whooping Cough	3	3.5
Measles	1	1.2
Gastritis, Diarrhoea and Enteritis	50	58.0

The zymotic Death Rate was 0.06 per 1,000.

The table below shows the trends in the causation of death at all ages since 1949.

**Causes of Death 1949-1957 (all ages)**

## Deaths in Middle Life.

It had previously been noticed in these reports that whereas the deaths of females between the ages of 45 and 64 had decreased quite considerably during the last 30 years, deaths of males within the same age group had not diminished in the same proportion, and in fact the male death rate between these ages has remained almost stationary since 1920. The result is that the percentage of male deaths amongst the total number of deaths for the year between these ages has become very much greater than those of females, as shown in the following table.

Table (i):—Deaths in successive years between ages of 45 and 64.

Year	Pop. of Cheshire	Deaths of persons aged 45-64	Death rate per 1000 pop. ages 45-64	Males	Females	% male deaths in total	% female deaths in total	No. male deaths divided by No. female deaths
1920	625,137	1750	2.80	927	823	52.9	47.1	1.13
1925	645,900	1968	3.03	1066	902	54.3	45.7	1.18
1930	677,100	2055	3.04	1113	942	54.2	45.8	1.18
1935	702,200	2163	3.08	1165	998	53.9	46.1	1.17
1936	709,092	2289	3.23	1274	1015	55.6	44.4	1.25
1937	721,100	2422	3.36	1332	1090	55.0	45.0	1.22
1938	729,400	2315	3.16	1204	1111	52.0	48.0	1.08
1939	738,400	2332	3.16	1287	1045	55.2	44.8	1.23
1940	767,770	2756	3.59	1594	1162	57.8	42.2	1.37
1941	774,410	2482	3.21	1382	1100	55.7	44.3	1.26
1942	757,900	2168	2.86	1181	987	54.5	45.5	1.20
1943	740,930	2255	3.04	1237	1018	54.9	45.1	1.22
1944	736,980	2218	3.01	1223	995	55.1	44.9	1.23
1945	733,370	2339	3.19	1319	1020	56.4	43.6	1.29
1946	768,510	2315	3.02	1347	968	58.2	41.6	1.39
1947	778,230	2203	2.82	1305	898	59.2	40.8	1.45
1948	795,590	2112	2.65	1216	896	57.6	42.4	1.36
1949	801,790	2155	2.69	1252	903	58.1	41.9	1.39
1950	819,720	2244	2.74	1330	914	59.3	40.7	1.46
1951	822,800	2462	2.99	1492	970	60.6	39.4	1.54
1952	826,300	2225	2.69	1346	879	60.5	39.5	1.53
1953	831,700	2270	2.73	1369	941	60.3	39.7	1.52
1954	831,400	2305	2.77	1393	912	60.4	39.6	1.53
1955	840,200	2288	2.80	1393	895	60.9	39.1	1.56
1956	850,400	2492	2.93	1555	937	62.4	37.6	1.66
1957	861,800	2389	2.77	1500	889	62.8	37.2	1.69

These figures refer to civilian population only, and show a constantly rising proportion of males to females, with four noticeable jumps in 1936, 1946, 1951 and 1956. The jump in 1946 was obviously at least partially due to the return of many men to civilian life with a correspondingly increased number of male deaths.

Over a period of approximately 2½ years, the particulars of persons dying between the ages of 45 and 64 have been extracted from the returns of the Registrars of Births, Marriages and Deaths.

Particulars of 6,101 deceased persons have been obtained in this way. Deaths were divided into five main categories:— those from coronary disease, from cancer of the lungs, bronchi and pleurae, from other cancers, from cerebral haemorrhage, thrombosis and embolism, and from other causes with the following result:—

Table (ii):—Classification of causes of death according to sex

		Deaths between 45 and 64					
		Coronary disease	Cancer of lung	Other cancers	Cerebral haemorrhages	Other causes	Total
Males	—	1067	415	543	393	1390	3808
Females	—	273	56	688	413	863	2293
Total	—	1340	471	1231	806	2253	6101
Ratio Males	Females	3.91	7.41	0.79	0.95	1.61	1.66

Using the Classification of Occupations issued by the General Register Office, the deaths of males were then classified into the occupational groups. Group III was, however, divided into three sections, (a) Clerks, Shop Assistants, etc., (b) foremen and charge-hands, (c) manual workers.

Table (iii):—Classification of deaths according to occupational groups

Occupational Group	Deaths aged 45 to 64 (males only)					
	Coronary disease	Cancer of lungs etc.	Other cancers	Cerebral haemorrhages	Other causes	Total
I (professional etc.)	94	19	31	21	77	242
II (managers, farmers, shopkeepers etc.)	222	63	89	78	227	679
III (a) (clerks)	174	46	64	59	186	529
III(b) (foremen, charge-hands etc.)	76	30	43	20	66	235
III (c) (skilled industrial workers)	226	104	137	97	336	900
IV (semi skilled workers)	107	78	87	47	189	508
V (labourers)	140	71	69	58	253	591
Not stated	28	4	23	13	56	124
Totals	1067	415	543	393	1390	3808

At the time of the 1951 census the percentages in Cheshire of employed males (over 16 years of age) in the several occupational groups was—Group I, 4.1%; Group II, 17.1%; Group III, 51.4%; Group IV, 13.6% and Group V, 13.8%.

Table (iv):—Causes of death expressed as percentages of the total number of deaths taking place in the several occupational groups

Occupation Group	Coronary disease	Cancer of lungs	Other cancers	Cerebral haemorrhage	Other causes
I (242 deaths) .....	38.8%	7.9%	12.8%	8.6%	31.8%
II (679 deaths) .....	32.7%	9.3%	13.1%	11.5%	33.4%
III (a) clerks, etc. (529 deaths) .....	32.9%	8.7%	12.1%	11.2%	35.1%
III (b) foremen, etc. (235 deaths) .....	32.3%	12.8%	18.3%	8.5%	28.1%
III (c) skilled manual workers (900 deaths) .....	25.1%	11.6%	15.2%	10.8%	37.3%
IV (508 deaths) .....	21.1%	15.4%	17.1%	9.2%	37.2%
V (591 deaths) .....	23.7%	12.0%	11.7%	9.8%	42.8%
Total deaths all groups (3684)	28.2%	11.2%	14.1%	10.3%	36.2%

The foregoing table shows clearly the higher proportion of male deaths from coronary disease in occupational groups I (professional etc.,) and to a lesser degree in Group II, and clerks and foremen (included in group III) over manual workers. Deaths from lung cancer were highest amongst manual workers (skilled workmen and foremen sub-groups) and particularly in IV (semi-skilled workmen).

Table (v):—Percentages of males in various occupational groups dying from the several causes of death

	Group I	Group II	Group III (a) clerks etc.	Group III (b) foremen etc.	Group III (c) manual workers	Group IV	Group V	Group not stated	Total
Coronary disease (1067 deaths)	8.8%	20.8%	16.3%	7.1%	21.2%	10.0%	13.1%	2.6%	100%
Cancer of lungs (415 deaths)	4.6%	15.2%	11.1%	7.2%	25.1%	18.8%	17.1%	1.0%	100%
Other cancers (543 deaths)	5.7%	16.4%	11.8%	7.9%	25.2%	16.0%	12.7%	4.2%	100%
Cerebral haemorrhages, etc. (393 deaths)	5.3%	19.9%	15.0%	5.1%	24.7%	12.0%	14.8%	3.3%	100%
Other causes (1390 deaths)	5.5%	16.3%	13.4%	4.7%	24.2%	13.6%	18.2%	4.0%	100%

Since, however, the numbers of males are so different in the several occupational groups, the picture becomes clearer if the comparison is made with reference to the same number of males in each group. The total number of males whose deaths are being investigated (omitting those whose occupational group is unknown) is 3684, so that the mean for each of the seven occupational groups used is 526. In the following table the figure obtained when this mean is divided by the number of deaths in each occupational group is used as a comparability factor:—

Table (vi)—Deaths from various causes in each occupational group standardised by use of a comparability factor.

Mean number of deaths for each occupational group:—526.

Occupational Group	I	II	III(a)	III(b)	III(c)	IV	V
Total deaths in each group	242	679	529	235	900	508	591
Comparability factor	2.17	0.77	0.99	2.24	0.58	1.04	0.89
Coronary disease	204	171	172	170	131	111	125
Cancer of lung	41	49	46	67	60	81	63
Other cancer	67	69	63	96	79	90	61
Cerebral haemorrhage	46	60	58	45	56	49	52
Other causes	167	175	184	148	195	197	225

The following table gives the deaths from coronary disease and angina pectoris for the years 1950 to 1957. The Registrar General first issued statistics for coronary disease as a separate cause of death in 1950.

Table (vii):—Deaths from coronary thrombosis in middle life

Year	Total deaths aged 45—64	Deaths from coronary disease ages 45—64	Percentage
1950	2244	339	15.1%
1951	2464	416	16.9%
1952	2225	372	16.7%
1953	2270	401	17.7%
1954	2305	455	19.7%
1955	2288	407	17.8%
1956	2492	558	22.4%
1957	2389	474	19.9%

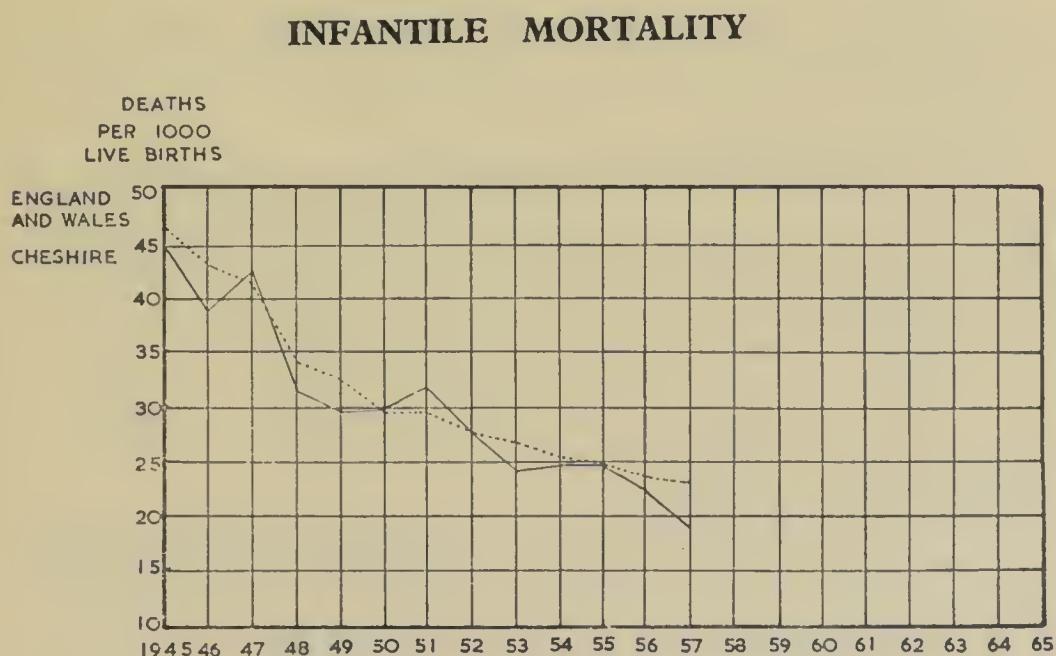

## **Observations**

- (i) The percentage of male deaths amongst persons dying in later middle life is now almost 63%.
- (ii) This percentage has risen steadily throughout the last twenty years and is still rising.
- (iii) Two causes of death, coronary thrombosis and lung cancer, account for approximately three-quarters of this excess of deaths amongst males.
- (iv) Almost four times as many males die from coronary thrombosis in late middle life as females, and more than seven times the number of males as females die from lung cancer in that age group.
- (v) Coronary thrombosis is by far the commonest single cause of death amongst males at these ages and accounts for approximately two-sevenths of male deaths between 45 and 64.
- (vi) A greater proportion of males in the occupational groups I and II, and of foremen and clerical, etc. workers in group III, die from coronary thrombosis than in the other occupational groups.
- (vii) The proportion of deaths from coronary thrombosis is increasing year by year.

### Infantile Mortality:—

		Under 1 year	Under 4 weeks
Deaths of Infants in the Administrative County during 1957	—	253	169
Legitimate	—	240	157
Illegitimate	—	13	12
All Infants per 1,000 live births	—	18.8	12.5
Legitimate Infants per 1,000 legitimate live births	—	18.4	12.0
Illegitimate Infants per 1,000 illegitimate live births	—	31.0	28.6

The figures for deaths under one year in recent years are shown in the following diagram :—

### Deaths from Puerperal Causes :—

	Deaths.	Rate per 1,000 total (live and still) births.
Pregnancy, Childbirth, Abortion	7	0.50

## Section III.-Vaccination and Immunisation

---

Under Section 26 of the National Health Service Act, 1946, the County Council has the duty of making available a full service of vaccination against smallpox and of immunisation against diphtheria; the organisation and management of the scheme has been devolved upon the Divisional Health Committees. Immunisation is also provided against whooping cough.

It is hoped that the attention now devoted to Health Services in general, and to this aspect in particular, will result in a considerable increase in vaccination, just as it has served to secure a wide response to the offer of immunisation. Immunisation is, in practice, meant for children, with particular attention to those under 5, but vaccination may on occasion be sought by persons of any age, and a recent amendment of the County Scheme has provided for this.

Arrangements made under the Council's scheme include participation by general practitioners and sessions at clinics.

### **Smallpox Vaccination**

During the year 1957, the number of persons vaccinated was as follows:—

		<i>Vaccinated</i>	<i>Re-Vaccinated</i>
Under 1 year .....	.....	5419	4
Age 1 year .....	.....	813	1
Age 2—4 years .....	.....	361	52
Age 5—14 .....	.....	364	201
Age 15 years and over .....	.....	516	1282

### **Diphtheria Immunisation**

During the same period the number of children notified as having completed a full course of primary immunisation against diphtheria was as follows:—

Children under 1 year .....	.....	4438
Children 1—4 years .....	.....	2665
Children 5—14 years .....	.....	430
		Total      7533

Total number of children who were given a secondary or reinforcing injection .....	.....	4637
--	-------	------

It is unfortunate that not all immunisations carried out are notified to the Local Health Authority and the above figures are therefore not complete.

The number of children at 31st December, 1957, who had completed a full course of immunisation against diphtheria at any time before that date was as follows:—

Born in Year	<i>Last complete course of injections (whether primary or booster)</i>	
	1953—57	1952 or earlier
1957	2524	—
1953—56	30357	—
1948—52	29565	23482
1943—47	13846	34488
Totals	1943—57	76292
		57970

The estimated mid-year child population for the year 1957 was as follows:—

Under 1 year	.....	.....	.....	12800
1—4 years	.....	.....	.....	48800
5—14 years	.....	.....	.....	132400
Total under 15 years	.....	.....	.....	194000

### **Whooping Cough Immunisation**

During the year 1957 the number of children who completed a full course of immunisation against whooping cough was as follows:—

Under 1 year	.....	.....	.....	5353
Age 1—4 years	.....	.....	.....	3765
Age 5—14 years	.....	.....	.....	545
Total	.....	.....	.....	9663

### **Poliomyelitis Vaccination**

The scheme was further extended in March, 1956 to include vaccination or immunisation against any other disease authorised by the Minister of Health. Approval was given by the Minister to the vaccination of children against poliomyelitis.

When the vaccination of children against poliomyelitis started in 1956 only children in the 1947-54 age group were registered for vaccination, but in May, 1957, the registration of children born in 1955 and 1956 was permitted. Further extension of the scheme was notified in November, 1957, when the registration started of children born in 1943 to 1946 and in 1957 and over six months of age, expectant mothers, general practitioners and their families, ambulance service staffs and their families and families of hospital staffs. To provide for the large increase in the number requesting vaccination it was necessary for the

Government to import Salk Vaccine manufactured in Canada and the United States to supplement the British Vaccines.

Statistics relating to the scheme in 1957 were as follows:—

(a) Children in 1943/57 age group awaiting vaccination at 31/12/57 .....	19,321
(b) Number of children vaccinated in 1957 .....	35,505
(c) Of those in (b), number receiving two injections .....	27,297
(d) Number of children receiving two injections from start of scheme to 31/12/57 .....	31,176

## Section IV.-Ambulance Service

---

The County Council is charged with the duty, under Section 27 of the National Health Service Act, 1946, to provide a comprehensive ambulance service throughout the County, free of charge to persons carried; the duty includes transport by car of persons who are unfit for public transport but do not need to be recumbent. The service is one which has been devolved for organisation and management within the approved estimates to Divisional Health Committees through-out the County. On and from 1st October, 1957, the use of ambulance service vehicles was permitted, when reasonably possible, for stand-by duty at gatherings and for the transport of sick or disabled persons when necessary but not covered by Section 27. Charges are made for these services under the National Health Service (Amendment) Act, 1957.

Arrangements are made to pay for the agency use of some Red Cross and St. John vehicles. In addition, there is a supplementary arrangement with the Voluntary Car service which, originally organised during the war, had been continued and paid for up to 5/7/48 by hospital authorities. Taxis and hired cars are also used as a supplementary service.

During 1957, delivery was taken of six Bedford Lomas ambulances, and thirteen Bedford Lomas Sitting case ambulances.

The arrangements by which the County Boroughs of Chester, Stockport, and Warrington, and the Counties of Shropshire and Derbyshire provided an Ambulance Service in particular areas, or for special purposes, were continued, as was the arrangement whereby the County Borough of Liverpool and the County of Lancashire convey smallpox patients or others needing special disinfection. On the other hand Cheshire supplies the night-time service for the Glossop area of Derbyshire.

For long distance journeys, use is made of the service provided by the Railway Executive for invalids, which comprises, for a small fee, a reserved compartment without payment of fares other than for the persons actually travelling. There are special arrangements for casual use, at an agreed fee, of other Authorities' ambulances, either at the far end of such a railway journey, or to meet special emergencies, and help is similarly given to other ambulance authorities.

The whole-time ambulance staff now approved consists of the following:—

Supervisors.....	.....	.....	11
Senior Drivers and Mechanics .....	.....	.....	15
Driver Attendants .....	.....	.....	165
Others .....	.....	.....	2

The following schedule shews the work done by the service for the financial year 1957—8:—

ITEM (1)	Directly Provided Service (2)			Supplementary Service (including Hospital Car Service). (3)			Transport by Rail (4)	
	Amb.	S.C.A.	S.C.C.	Total	Amb.	S.C.A.	S.C.C.	
1. No. of persons carried (excluding relatives, escorts and friends)

## Section V.-Prevention of Illness, Care and After-care

---

### General

Section 28 of the National Health Service Act, 1946, gives permissive powers to the County Council to make a scheme for prevention of illness, and for the care and after-care of persons suffering from illness. The County Council has a duty to make detailed arrangements for any disease the Ministry may specify. In this connexion, tuberculosis has been so specified, and much of the work, other than clinic and institutional provision, which was carried out for many years under the County Tuberculosis Scheme, is being continued under the new powers.

The arrangements under this section of the Act are among those which for organisation and management, within the approved estimates, have been devolved to Divisional Health Committees.

### Tuberculosis

Consultant Chest Physicians, the main part of whose work at chest clinics passed to the Regional Hospital Boards on the appointed day, are part-time officers of the County Council, and give Divisional Medical Officers all necessary advice in the sphere of care and after-care; Health Visitors pay home visits to tuberculosis patients and help to secure the attendance of contacts at the clinics. The loan of large items such as garden shelters and the supply of smaller items such as sputum flasks, now form part of the general scheme for the provision of nursing equipment, of which details are given later.

Wrenbury Hall Industrial Training Colony has continued under the full ownership and control of the County Council. During the year 1957, some 9 Cheshire trainees were admitted for industrial rehabilitation, and 6 from other local authorities. There are at present 27 colonists living in the hostels, of whom 7 are married, and 5 married colonists living with their families in cottages on the estate.

The following tables will enable a comparison to be made between 1957 and previous years in respect of the incidence of, and mortality due to, tuberculosis.

### Tuberculosis Statistics

	1957	1956	1955
New cases notified (primary)			
Pulmonary ....	374	392	431
New cases notified (primary)			
Non-pulmonary ....	61	68	74
Total ....	435	460	505

No. of cases remaining on Registers of Notifications kept by District M.O's.H., December 31st ....	5559	5392	5247
No. of Deaths from all forms of Tuberculosis ....	83	106	90
Death-rate from all forms of Tuberculosis per 1,000 of the population ....	0.10	0.12	0.11

*Table relating to Tuberculosis in children under 16 :—*

Year	Number of Children notified as suffering from Pulmonary Tuberculosis	Number of Children notified as suffering from Non-Pulmonary Tuberculosis	Percentage of Total Notifications	
			Pulmonary	Non-Pulmonary
1948	24	101	5.4	63.9
1949	21	73	4.8	59.3
1950	24	59	5.2	48.8
1951	30	63	6.9	55.3
1952	56	62	12.5	52.1
1953	55	45	12.7	55.6
1954	46	54	12.4	62.1
1955	45	38	10.4	51.3
1956	40	30	10.2	44.1
1957	18	26	4.8	42.6

*Table showing primary notifications and deaths from Tuberculosis during past 30 years:—*

Year	Primary notifications	Deaths	Death rate per 1,000 population
1928	932	499	.74
1929	917	465	.69
1930	838	438	.64
1931	802	438	.64
1932	751	460	.66
1933	754	389	.57
1934	765	377	.54
1935	739	367	.52
1936	752	348	.49
1937	799	373	.52
1938	802	360	.49
1939	709	358	.48
1940	674	403	.52
1941	740	402	.52
1942	713	302	.40
1943	685	339	.46
1944	734	332	.45
1945	669	302	.41
1946	510	310	.40
1947	655	296	.38
1948	601	279	.35
1949	565	266	.33
1950	582	195	.24
1951	546	181	.22
1952	568	146	.18
1953	514	104	.12
1954	458	113	.13
1955	505	90	.11
1956	460	106	.12
1957	435	83	.10

The 1957 deaths are made up as follows :—

		Male	Female	Total
Pulmonary	—	59	13	72
Non-Pulmonary	—	5	6	11
		—	—	—
		64	19	83
		—	—	—

#### Death Rates, 1957—

All forms	.10	per 1000 of population
Pulmonary	.08	per 1000 of population
Non-Pulmonary	.02	per 1000 of population

#### Contacts.

During the year 1957, approximately 3,258 contacts of tuberculous patients were examined by Chest Physicians, with the co-operation of the health visitors, who visited their homes whenever necessary. Particulars were sent as usual to the Physicians of all tuberculosis deaths (whether of notified or unnotified cases) to assist in arrangements for contact examination.

#### Mass Miniature Radiography

During 1957 the following surveys by Mass Miniature Radiography Units were completed:—

##### Liverpool Unit—

Malpas and Tattenhall	1st and 2nd June
Runcorn and Frodsham	7th October to 31st December

##### Manchester Unit—

Hyde	2nd January to 25th February
Dukinfield	10th May to 11th June
Stalybridge	19th June to 16th July
Holmes Chapel	17th to 24th July
Middlewich	11th to 24th September
Winsford	2nd to 15th October
Congleton	16th October to 13th November

The opportunity was taken during these visits to arrange for the nursing, teaching, and children's department staff in the districts concerned to be examined on a voluntary basis. Mantoux positive children tested for B.C.G. Vaccination were also examined.

The following table gives the number of examinations made and details of the abnormalities detected:—

	<i>Malpas and Tatten- Frodsham hall</i>	<i>Runcorn and Frodsham hall</i>	<i>Hyde</i>	<i>Dukin- field</i>	<i>Staly- bridge</i>	<i>Holmes Chapel</i>	<i>Middle- wich</i>	<i>Wins- ford</i>	<i>Congle- ton</i>
No. of miniature examinations	.....	688	7,757	10,830	3,940	6,510	1,390	2,350	2,410

## B.C.G.

The County Council's proposals under Section 28 of the National Health Service Act, 1946, for B.C.G. vaccination of contacts of tuberculous persons were approved by the Minister on 24th October, 1949. They provided for B.C.G. vaccination, by and at the instance of a physician with specialist knowledge and experience of tuberculosis, of contacts of patients suffering from tuberculosis, such contacts being found by medical tests to be capable of receiving protection from tuberculosis as a result of B.C.G. vaccination. In May, 1954 approval was given by the Ministry of Health to the Scheme being extended to provide for the B.C.G. Vaccination of children between 13 and 14 years of age.

In the first place those physicians with specialist knowledge and experience of tuberculosis were the chest physicians employed by the Regional Hospital Board, towards whose salary the County Council pays a specified proportion. All Divisional Medical Officers and four Assistant County Medical Officers have now received instruction in the technique and methods of B.C.G. vaccination and have been approved for this purpose.

During 1957, the chest physicians vaccinated 698 cases, and the Divisional Medical Officers vaccinated 181 cases, under the contact scheme. In addition to these, 278 new-born infants were vaccinated.

Divisional Medical Officers and Assistant County Medical Officers vaccinated 4751 school children during the year and details of the work carried out under the scheme for school children are as follows:—

### *Before B.C.G. Vaccination*

No. of consent forms issued	.....	.....	.....	9398
No. of children for whom consents received	.....	.....	.....	6998
No. of patch tests by tuberculin jelly	.....	.....	.....	2633
No. positive to patch test	.....	.....	.....	574
No. Mantoux tested	.....	.....	.....	5450
No. positive to Mantoux test	.....	.....	.....	1122
No. Negative to „ „	.....	.....	.....	4206
<i>No. Vaccinated by B.C.G.</i>	.....	.....	.....	4751

### *After B.C.G. Vaccination*

No. having follow-up Mantoux (8 weeks)	.....	.....	3313
No. positive to follow-up Mantoux (8 weeks)	.....	.....	3131
No. negative to follow-up	.....	.....	98
No. having follow-up Mantoux (12 months)	.....	.....	3493
No. positive to follow-up Mantoux (12 months)	.....	.....	3195
No. negative to follow-up	.....	.....	81
No. re-vaccinated	.....	.....	32

## **Mental Illness**

The care and supervision of patients at home suffering from mental illness or defect is carried out by Health Visitors and Authorised Officers, and arrangements are made, in suitable cases, for help to be given by other County services, such as Home Nursing and Domestic Help.

## **Other Illnesses**

Liaison has been continued with the Almoners and other appropriate officials of general hospitals so that discharged patients requiring help from any of the County Health Services may secure it without delay.

Another aspect of "care" is the investigation of "problem families" with a view to effecting any possible improvement and granting any appropriate help.

An important aspect of "prevention of illness" is health education, and appropriate publicity under this heading is carried out locally.

The County Health Committee has joined the Manchester Committee on Cancer with respect to the whole of that part of Cheshire which lies within the area of the Manchester Regional Hospital Board. Special publicity in County Clinic Centres and by means of Health Visitors has been given to the prevention of home accidents.

## **Nursing Equipment**

Stocks of nursing equipment are held by District Nurses and by Divisional Medical Officers for loan to patients needing them, subject to a small deposit charge, and a weekly hire payment in the case of the more expensive items. Examples of the small items normally kept by District Nurses are urinals, hot water bottles, bed pans, feeding cups, sputum flasks, steam kettles, air rings and back rests; the larger items stored by the Divisional Medical Officers include crutches, bath chairs, spinal carriages and water beds.

Shelters for the use of tuberculosis patients are issued by the County Medical Officer and transferred by the County Surveyor's Department, in accordance with recommendations made by the Chest Physicians, and confirmed, after investigation of the site, by the Divisional Medical Officer. Bedding is also kept for issue in special cases, e.g., when a patient's small stock has to be taken away for disinfection or disinfestation, or to provide for house isolation of patients.

## **Recuperative Convalescence**

During the year 1957, 52 patients were sent for recuperative convalescence for periods varying between two and eight weeks. Contributions were paid by the patients towards the cost of this convalescence in accordance with the County scale. Also under Section 28, seven mentally defective children were found accommodation for short periods during the year,

## **Sitters-In**

Facilities exist to supplement, in specially approved cases, the Domestic Help service by means of night sitters-in. In 1957 sitters-in were provided for eleven cases.

## **Infectious Disease**

In order that Divisional Health Committees may have a continuous picture of the incidence of infectious disease in their areas, Divisional Offices receive full particulars of notified cases, and the County Council repays to District Councils, in accordance with the National Health Service Act, the notification fees paid to doctors. The following table gives the number of cases notified under the various headings during the year 1957.

	Scarlet Fever	Whooping Cough	Acute Poliomyelitis	Paralytic	Acute Poliomyelitis	Non-Paralytic	Measles (excluding Rubella)	Diphtheria	Acute Pneumonia	Dysentery	Smallpox	Acute Encephalitis	Infective

## Section VI.-Mothers and Young Children Health Visiting, etc.

### General

The County Council's responsibilities under Sections 22 and 24 of the National Health Service Act, 1946, are in the main a continuation of work which has been done for many years, though the Health Visitors' services are now used to carry out the Council's schemes for mental health, after-care, and handicapped persons.

Number of Health Visitors employed—31.12.1957	—	—	—	110
Equivalent whole-time H.V. Services provided	—	—	—	77

Number of visits paid by Health Visitors during the year.

Number of children under 5 years of age	—	—	—	66,162
Expectant Mothers—				
First Visits	—	—	—	4,137
Total Visits	—	—	—	7,083
Children under one year of age—				
First Visits	—	—	—	13,876
Total Visits	—	—	—	90,208
Children aged 1 and under 2 years—				
Total Visits	—	—	—	45,529
Children aged 2 but under 5 years—				
Total Visits	—	—	—	74,751
Tuberculosis Households—				
Total Visits	—	—	—	7,124
Other cases—				
Total visits	—	—	—	25,964
Total number of households or families visited	—	—	—	65,329

### Premature Infants

Particular attention is devoted to babies weighing  $5\frac{1}{2}$  lbs. or less at birth, and special cots with bedding, hot water bottles, etc., are kept in readiness. 852 premature live babies were born in the year under review, whose mothers normally live in the Authority's area, 183 at home and 669 in hospitals or nursing homes.

### Puerperal Pyrexia

42 cases of Puerperal Pyrexia were notified during the year, 10 being domiciliary and 32 institutional confinements.

### Maternal Mortality

The maternal mortality for 1957, i.e., number of deaths due to pregnancy, childbirth or abortion, per 1,000 live and still births, was 0.51.

## **Ante-Natal and Post-Natal Clinics**

The number of Ante-Natal clinics conducted by Doctors was 19. The Regional Hospital Boards pay for a proportion of the sessions attended by specialist obstetricians. In some areas there are other doctors' clinics, and in some districts midwives' clinics have been established.

The following Tables give particulars of County clinics held during 1957:—

### **Doctors' Clinics**

	Sessions	ANTE-NATAL		POST-NATAL*	
		Attend- ances	New Cases	Attend- ances	New Cases
Bredbury	—	48	378	144	—
Cheadle	—	50	1645	326	1

## **Notification of Births**

The distribution of the births to Cheshire mothers notified under the Public Health Act, 1936, was as follows :—

Domiciliary	Nursing Homes	Hospitals
4420	312	8726

## Dental Care

Increasing importance is now attached to the provision of Dental services for expectant and nursing mothers, and for young children. Facilities will be extended as opportunity offers, subject to the availability of necessary staff.

### DENTAL REPORT

Mothers and young children are dealt with during School Dental clinic sessions.

All necessary treatment is carried out, if necessary with local or general anaesthetic.

All dentures are set up by a mechanic, and impressions and fittings carried out by the dental surgeon.

Two clinics possess X-Ray apparatus, and for other clinics arrangements are made with the local hospital.

The following details show the work done during the year 1957:—

1957	Expectant Mothers	Nursing Mothers	Children under 5 years
<b>(a) Numbers provided with Dental Care</b>			
Examined	205	291	1064
Needing Treatment	198	291	949
Treated	198	282	940
Made Dentally Fit	131	223	826
Total Attendances	362	880	1233
<b>(b) Forms of Dental Treatment Provided</b>			
Temporary Extractions	—	—	1474
Permanent Extractions	698	1606	—
Temporary Teeth Filled	—	—	471
Permanent Teeth Filled	100	156	—
Anaesthetics —Local	72	126	62
General	76	150	575
Partial Upper Dentures fitted	13	25	—
Full Upper Dentures fitted	12	85	—
Partial Lower Dentures fitted	5	27	—
Full Lower Dentures fitted	8	55	—
Scalings or Scaling and Gum Treatment	45	47	1
Silver Nitrate Treatment	—	2	57
Dressings	34	26	38
Radiographs	4	5	2

## **Artificial Sunlight Treatment**

During the year 1957, the attendances by children under 5 at the sunlight clinics listed below were as follows:—

Dukinfield	.....	417	Sale	.....	.....	313
Hyde	.....	1349	Stalybridge	.....	.....	616
New Ferry	.....	136				

## **Orthopaedic Scheme**

The specialist orthopaedic sessions held at clinic premises are conducted by the Regional Hospital Boards, in the same way as those held at hospital premises, and suitable financial arrangements were made for the few clinics where physiotherapy was only partly under specialist supervision.

The following shews the attendances made during 1957 at such clinics (excluding those for sunlight only) by children under 5:—

Dukinfield	.....	87	Northwich	.....	.....	480
Ellesmere Port	.....	143	Runcorn	.....	.....	242
Hyde	.....	590	Stalybridge	.....	.....	281
New Ferry	.....	250	Stockton Heath	.....	.....	258

## **Infant Foods**

The financial arrangements involved in the supply of infant foods at Welfare Centres continued in the main to be dealt with by Divisional Medical Officers and the voluntary committees' valued help in the various aspects of centre work was continued.

## **Welfare Foods Service**

At 31st December, 1957 there were, in all, 191 distribution centres in the administrative county, 155 of these being manned by voluntary personnel, and 36 by full-time or part-time paid staff, including the staffs of the local district councils where, by arrangement, points have been established on district council premises.

Supplies are received from S.P.D. Depots at Hanley, Liverpool, Manchester and Welshpool. S.P.D. Ltd. act as agents of the Ministry of Agriculture, Fisheries and Food in the matter of storage and delivery. It is usual for 4 to 5 weeks supply of Welfare Foods to be held at each distribution centre.

A total of 1,019,539 articles were distributed to individual beneficiaries, Institutions, N.H.S. Hospitals, and day nurseries during the period 30th December, 1956 to 28th December, 1957, made up as follows:—

National Dried Milk	.....	.....	.....	276,306	tins
Cod Liver Oil	.....	.....	.....	73,610	bottles
Vitamin A & D Tablets	.....	.....	.....	40,315	packets
Orange Juice	.....	.....	.....	629,308	bottles

## **Day Nurseries**

Details of the 13 Day Nurseries now maintained by the County Council are given on page 33. The following table shows the position at the end of 1957:—

No. of Nurseries	No. of Places		No. of Children on register		Average daily attendance	
	0—2	2—5	0—2	2—5	0—2	2—5
13	233	333	138	378	109	299

## **Care of Unmarried Mothers**

Arrangements have continued whereby unmarried expectant mothers are admitted to voluntary institutions some time before the confinement, and return there with the baby for varying periods afterwards. The County Council's own Home at 7, Trinity Road, Hoylake, provides 12 beds and 8 cots, and 47 women were admitted during the year, staying approximately eight weeks before the birth and six weeks afterwards. Responsibility was accepted at other homes and hostels for 55 such mothers during the year.

## **Child Welfare Centres**

The following Table gives particulars, as in previous years, of the sessions and attendances at Child Welfare Centres throughout the County:—

### Nursing and Maternity Homes

The County Council is the registration Authority for private Nursing and Maternity Homes under Sections 187 to 194 of the Public Health Act, 1936, for the whole County, and the following details show the position for the year ended 31st December, 1957:—

No. on Register, 31/12/57	.....	30
No. of inspections during 1957	.....	39
No. of new homes registered in 1957	.....	1

### Homes for Old People, etc.

The regulations for registration and inspection of voluntary homes for old people, etc., namely the National Assistance (Registration of Homes) Regulations, 1949, are administered by the County Health Department, and the position for the year ended 31st December, 1957, is shewn below:—

No. on Register, 31/12/57	.....	20
No. of inspections during 1957	.....	11
No. of new homes registered in 1957	.....	—

### Nurseries and Daily Minders

The County Health Department is responsible for the inspection and registration of premises under the Nurseries and Child Minders Regulation Act, 1948, and the position on 31st December, 1957, was as follows:—

(a) (i) Number of factory nurseries registered	.....	9
(ii) Number of children provided for	.....	264
(b) (i) Number of daily minders registered	.....	12
(ii) Number of children provided for	.....	119

## Section VII.-Midwifery

### General

A summary of the numbers involved is given below, further details on pp. 29-30, and general information, relating both to district nurses who practise midwifery and to those who do not, in Section XI.

### Number of Midwives in Practice

There were 342 midwives who notified their intention to practise in the County Area during 1957:—

County Midwives	.....	.....	.....	.....	.....	62
District Nurse Midwives	.....	.....	.....	.....	.....	120
Independent Midwives	.....	.....	.....	.....	.....	23
Practising in Private Nursing Homes	.....	.....	.....	.....	.....	10
Practising in Institutions	.....	.....	.....	.....	.....	127

### Inspection of Midwives

Visits paid by Senior Medical Officer	.....	.....	.....	.....	116
Lectures to midwives and pupils	.....	.....	.....	.....	24
Visits paid by Non-Medical Supervisor of Midwives:—					
Inspection of County Midwives	.....	.....	.....	.....	140
Inspection of Independent Midwives	.....	.....	.....	.....	8
Statutory supervision of District Nurse Midwives	.....	.....	.....	.....	133
Special visits to Midwives	.....	.....	.....	.....	79
Visits to pupil Midwives	.....	.....	.....	.....	38
Lectures to pupils and Midwives	.....	.....	.....	.....	8
Cases visited:—					
Labours	.....	.....	.....	.....	6
Nursings	.....	.....	.....	.....	65
Ante-natal	.....	.....	.....	.....	26

### Cases attended by County Midwives and District Nurse Midwives on County Council Staff

	<i>Deliveries (live and still)</i>		<i>Stillbirths included in Cols. a &amp; b</i>	<i>Miscarriages</i>
	<i>Col. a as midwives</i>	<i>Col. b as maternity nurses</i>		
Midwives	1,856	682	25	77
District Nurse Midwives	836	678	17	53
Total	2,692	1,358	42	130

Number of patients attended by midwives following early discharge from Hospital ..... 3649

### Notifications received (Central Midwives Board Rules)

Medical Aid .....	.....	.....	.....	.....	.....	.....	1156
Stillbirths .....	.....	.....	.....	.....	.....	.....	78
Laying out the Dead .....	.....	.....	.....	.....	.....	.....	50
Source of Infection .....	.....	.....	.....	.....	.....	.....	117
Artificial Feeding .....	.....	.....	.....	.....	.....	.....	1818
Deaths in the Practice .....	.....	.....	.....	.....	.....	.....	21

### Gas and Air Analgesia

(a) Number of domiciliary midwives practising in area 31/12/57, who were qualified to administer inhalational analgesics .....	.....	.....	.....	.....	.....	.....	170
(b) Number of sets of apparatus in use by above, 31/12/57 .....	.....	.....	.....	.....	.....	.....	146
(c) Number of cases in which inhalational analgesics were administered, 1957—							
(a) when doctor was not present .....	.....	.....	.....	.....	.....	.....	2360
(b) when doctor was present .....	.....	.....	.....	.....	.....	.....	864

### Pethidine

Number of cases in which pethidine was administered by  
domiciliary midwives during 1957:—

(a) When Doctor was not present .....	.....	.....	.....	.....	.....	1574
(b) When Doctor was present .....	.....	.....	.....	.....	.....	730

## Section VIII.-Food and Drugs Acts

---

### Milk (Special Designations) (Pasteurised and Sterilised Milk) Regulations, 1949.

#### Milk Supply

The Department continued its work during the year in connection with the milk supply, as a contribution towards the aim of ensuring that all milk sold within the county reaches the consumer in a clean and wholesome condition and free from disease-producing organisms.

One of the most important duties of the County Council in this respect is the licensing and supervision of milk pasteurising and sterilising plants within its "Food and Drugs" area. During the year 1957, 26 pasteurising licences and 5 sterilising licences were in operation at 27 different dairies within the administrative area. The dairies range from the small family concern to several of the largest dairies in the country.

So far as the pasteurising establishments are concerned, nine of them were operating holder type plant, with outputs of from 140 to 500 gallons per day. This type of plant is comparatively simple in design, but with very little in the way of mechanical safeguards and thus everything depends upon the person operating it. The remaining 17 licences for the pasteurising of milk were issued in respect of plants operating on what is termed the "high temperature — short time" principle, and here the output at the dairies concerned ranges between 550 and 16,000 gallons per day. These plants are of more complicated design, but are largely automatic in operation, and have safeguards incorporated for the diversion of any milk which has not been sufficiently heated. When failures do occur on these plants, the investigation of faults is a more difficult matter and may entail spending a considerable amount of time in the dairy.

The milk sterilising licences are issued in respect of two main types of plant, the batch type where a "tank" is loaded with bottles of homogenised milk and the sterilisation is then effected by raising the temperature of the milk under pressure to some few degrees above boiling point, and the continuous process where the bottles of homogenised milk move continuously through the plant and are heated, held and cooled before issuing at the other end of the machine for loading into crates. The plants licensed in Cheshire vary from a small installation processing 130 gallons per hour to a large dairy which has two continuous process plants each dealing with 1,000 gallons per hour, and sterilising in all about 15,000 gallons per day.

It is estimated that the dairies licensed by the County Council process on an average about 115,000 gallons of milk per day, of which 85,000 gallons is pasteurised milk and 30,000 gallons sterilised milk.

The importance of the work of supervising these dairies will be realised when one notes that this quantity of milk represents the daily

consumption of a population of about 1,315,000 people. As the population of the administrative county is about 850,000, it will be seen that the Department is actually safeguarding the supplies of a large population outside its own area. This is accounted for, of course, by the fact that milk from several of the largest dairies in the county area is transported long distances before being retailed. Incidentally, the milk from the licensed plants is subject to sampling by any local authority in whose area the milk is sold, and it speaks well for the general standard maintained that very few samples indeed are reported by local authorities to the department as being unsatisfactory in any respect. The Department maintains a close check on the licensed dairies in two ways. Samples of processed milk are collected three times a week from all the plants and these are examined by tests which show whether the milk has been adequately heat treated and also whether the milk is of a satisfactory standard of cleanliness. Washed bottles are also regularly collected and brought to the laboratory for examination to disclose the efficiency of the bottle-washing process in the dairy.

In addition to this the County Health Inspector pays routine visits to the dairies from time to time and checks not only the processing but also the condition of the premises and the general maintenance of good standards of hygiene; this work is very necessary. It is found that a visit, especially to the smaller dairies, will often forestall a sample failure by detecting an incipient fault. But even in dairies where the sampling record is excellent and failures are exceedingly rare, it is found in many cases that unless the Inspector can pay a visit from time to time the general hygienic standard of the premises tends to deteriorate. In other words, sampling by itself, however frequent, is not sufficient.

In the case of a milk sample failing to pass the prescribed tests, the County Health Inspector endeavours to make an immediate inspection to try to ascertain the cause of the failure. The majority of failures occur in the smaller dairies operating holder types of pasteurising plants and usually it is the human element which is at fault, though occasionally a mechanical fault or an inaccurate thermometer is found to be responsible.

From the figures of milk examinations made by the laboratory during the year it will be seen that 29 samples failed in the Phosphatase test which is the official test for the correct heat treatment of pasteurised milk (the Aschaffenburg-Mullen test is an unofficial test for the same purpose which is quicker and equally reliable and this is also carried out by the laboratory on all samples of pasteurised milk). Of the 29 samples which failed, 24 were from dairies licensed by the County Council, and 5 from dairies in the areas of other Food and Drugs authorities (dealt with under the Milk in Schools Scheme). Of the 24 failures on plants within the administrative area, 21 were from holder plants and 3 from a H.T.S.T. plant which had been bought from

another dairy and had a certain amount of "teething troubles" before it settled down. Of the 21 samples from holder plants more than half of these were from two dairies which caused the department some concern during the year. Both were small dairies where the operatives were not entirely reliable and where the supervision from time to time was inadequate. The owners of the dairies had to be warned very firmly that further lapses could not be tolerated, and since that time these two dairies have given very little trouble.

In considering the number of failures which arose, it must be borne in mind that each dairy is sampled three times weekly (including certain Sunday visits), *i.e.* 156 times each year, and thus any defect in processing at any particular time is quickly detected. Some authorities sample much less frequently than this and the number of failed samples in a year will consequently be much less for the same degree of efficiency at the plants.

The figures of samples examined by the laboratory continue to show very satisfactory results. The percentage of samples which failed the phosphatase test (0.66%) was much the same as in 1956. Failures on the cleanliness test (the reductase test) were less than in 1956, totalling 4 of 4,347 samples examined (0.09%). The 889 samples of sterilised milk examined by the official Turbidity test, all passed. A total of 4,630 washed bottles was examined. These are collected by the sampling officers at the dairy at the same time as milk samples are collected. Each bottle was examined by the plate count test, and for the presence of coliform organisms. Although these tests have no legal authority they are a most useful indication to the dairy concerned of the efficiency of their bottle-washing machines, especially in the case of the smaller dairies who have no laboratory facilities on their own premises.

During the year, 362 samples of milk were examined for the detection of traces of hypochlorite residuals, but without any positive indications. The need for this test is due to the extensive use in these days of oxidising or preservative agents in the cleansing of milk vessels. Only certain products, approved by the Minister of Agriculture, Fisheries and Food, may be used and the Milk and Dairies Regulations require all trace of such agents to be removed before the vessel is again brought into contact with milk.

Cheshire is fortunate in having its own milk laboratory, attached to the Public Health Department, and close contact is maintained between the laboratory and the licensed dairies in the county. The regular reporting of the results of examinations of milks and washed bottles is of great value to the dairies, and a rapid report to the dairy concerned of a border-line sample result, often enables the dairy to take immediate steps to find where the processing has fallen below its usual standard and to correct the fault without delay.

## Milk in Schools Scheme

All milk supplies under this scheme are subject to the approval of the County Medical Officer. Any new supply proposed for any particular school is first referred by the Director of Education to this department for approval.

Figures are given of samples of school milks examined in the laboratory during 1957. In the case of schools supplied by dairies licensed by the County Council, the samples were collected from the dairies before the milk was delivered to the schools. In the case of schools supplied by dairies licensed by other authorities, *e.g.* neighbouring county borough or county councils, the samples were collected at the schools. At the end of the year arrangements were made for all school milk samples to be collected at the schools and this system was put into operation in January 1958. It should be noted that the school milk figures are also included in the table showing *total* examinations carried out in the county laboratory. It will be observed that 12 school milk samples failed the official Phosphatase test and 1 the official Reductase test. Of the 12 samples which failed the Phosphatase test, 5 were samples of the milk supplied by dairies in the areas of other Food and Drugs authorities. In these cases appropriate action was taken in conjunction with the authorities concerned. In the remaining cases, the matter was taken up with the dairies concerned by the County Health Inspector in the usual way.

## Tuberculous Milk

A specific duty is laid upon county councils by the Food and Drugs Act, 1955 to administer provisions designed to prevent the sale of tuberculous milk. Although the number of undesignated herds (*i.e.* herds other than tuberculin-tested herds) in the county is decreasing year by year, there are still a considerable number. For the purpose of discharging the County Council's duty in this respect, the sampling officers visit the undesignated farms from time to time and collect a *bulk* sample of milk which is then submitted for biological examination to the Public Health Laboratory Service either in Manchester or in Birkenhead. During the year 1957, 2,790 such samples were submitted and 112 were reported as containing the organisms of tuberculosis. These positive samples were reported to the Divisional Veterinary Officer of the Ministry of Agriculture, Fisheries and Food and the Ministry's officers take steps to try to find the cow or cows which are secreting tubercle bacilli in their milk. Any cows so found are slaughtered under the Tuberculosis Order of 1938. Tuberculous positive milk samples are also reported to the Medical Officers of Health of the districts where the milk is produced or retailed. The Medical Officer of Health has powers under the Milk and Dairies Regulations, 1949, to place restrictions upon the sale of such milk for human consumption, until the herd has been declared free from infection by the Ministry.

## Specified Areas

Progress towards the attainment of a nation-wide standard for milk sold to the public is being made by the declaration of what are called "specified areas". In any such area, only the "specially designated" milks may be sold, *i.e.* pasteurised, sterilised and tuberculin-tested milks. It is hoped that eventually the whole country will be covered by these Orders, and already considerable progress has been made. So far as Cheshire is concerned, at the end of 1957 approximately 80% of the population of the administrative county were living in areas covered by the operation of these Orders, and it is understood that the specification of other areas of the county is under consideration.

## County Public Health Laboratory

The following tables show the work of the laboratory during the year 1957 and comparative figures for previous years are also given:—

Total number of examinations made during the year 1957—

Milks :	Pos.	Neg.	Total
Cultures for Coliform bacilli .....	81	4289	4370
	Failed	Passed	Total
Aschaffenburg and Mullen Test (Pasteurised milks) .....	29	4341	4370
Phosphatase test (Kay-Graham) (Pasteurised milks) .....	29	4341	4370
Clot on boiling test .....	—	4391	4391
Reducitasc test .....	4	4343	4347
Turbidity test (sterilised milks) .....	—	889	889
Plate counts .....	—	—	1528
Hypochlorites Test .....	—	362	362
Washed Bottles (two examinations each) .....	—	—	9260
Total examinations made of all specimens			33,887

Milk Specimens examined 1948-57

200 to 600	—	—	—	—	Fairly satisfactory
Over 600	—	—	—	—	Unsatisfactory

\* It was not possible to carry out any of these examinations between mid June and mid October due to a breakdown of the incubator in the laboratory.

### Samples for analysis

The Chief Inspector of Weights and Measures, Food and Drugs, etc., (the late Mr. Stacey Hallard) reported as follows on the work of his Department in administering the Food and Drugs Act, 1955, so far as it related to the sale of non-standard or adulterated food or drugs.

The main work of the Department concerns the taking of samples of any food or drug on sale and submitting it to the Public Analyst for analysis. The area in which this work is carried out is that for which the County Council is the "Food and Drugs Authority" i.e., the whole of Cheshire excepting the four County Boroughs and the Municipal Boroughs of Bebington, Crewe and Sale. Much of the work is of a routine character and the number of samples obtained is based on the generally accepted standard of approximately 2½ samples per thousand of the population in rural areas and 3 per thousand in urban areas. This number has been accepted as adequate by the appropriate Ministry (currently the Ministry of Agriculture, Fisheries and Food) to whom a report is made each quarter. As one might expect the vast majority of the samples are certified to be genuine in that they conform to any statutory standard for the time being in force or otherwise are of good commercial quality.

Most of the non-standard samples, other than milk, were found as a result of routine sampling, but the majority of the milk prosecutions were instigated as a direct result of the help given by one or other of

the wholesale Dairy Companies. For their own protection these companies constantly test in their own laboratories the milk they receive from farmers. On finding an adulterated milk they usually request the aid of the Department in obtaining official samples. Thus a Sampling Officer is detailed to follow-up these informal tests by taking official samples on the next occasion the milk from the suspected farmer is being handed over at the farm or Dairy.

During the year 2033 samples of all types of food and drugs were obtained and submitted for analysis to J. Graham Sherratt, Esq., B.Sc., F.R.I.C., the Public Analyst for Cheshire. The total was made up of 1,210 milks and 823 miscellaneous articles of food, details of which will be found in the following table:—

<i>Article</i>	<i>Total Analysed</i>	<i>Samples certified as adulterated or otherwise not in order</i>
Boric ointment	6	2
Bread	1	1
Buttered barm cake	2	2
Buttered liquorice sweets	1	1
Celery soup	1	1
Cod liver oil	27	3
Drambuie	1	1
Flavouring, strawberry	1	1
Glycerine	6	1
Halibut liver oil caps.	2	1
Lard	17	3
Marmalade	2	1
Milks	1,210	103
Milk flavouring	1	1
Mint Jelly	1	1
Orange Squash	2	2
Plain Flour	63	15
Pork sausage meat	1	1
Pork sausage	10	6
Quinine compound tablets	1	1
Sago, flaked	2	2
Sulphur and Yeast tablets	2	1
Sweet spirit of nitre	1	1
Table jelly	7	1
Teasol	1	1
B.P. Official preparations, simple household medicaments, etc.	151	—
Miscellaneous groceries and unclassified articles	513	—
	2,033	154

Regarding the milks,—of the 103 shown as adulterated or non-standard, 14 contained added water, 19 were deficient in fat and 70 were deficient in non-fatty solids. The amount of added water present in the 14 samples varied from 2.3 per cent to the phenomenal figure of 91.8 per cent. The circumstances in connection with this latter sample and several of others worthy of mention are given below.

It is only fair to say that no one would allege that any sane person would deliberately add 91.8 per cent of water to milk. Nevertheless this particular bottle of sterilised milk was sent out by a Dairy Company and delivered to a householder. The householder could see that it was heavily "watered" and complained to an Inspector of this Department, who submitted it for analysis. On investigation the bottlers suggested that the trouble was no doubt due to an occurrence which could take place during the sterilization process if there was a defective cap or bottle-neck. Even allowing that this was the explanation, the inspectional side of the business must have been seriously at fault for such a bottle to leave the dairy. In view of this, legal proceedings were instituted and the bottlers were fined £5 and £2 8s. 0d. costs.

Another serious case (as the adulteration was undoubtedly deliberate) related to a complaint by a Cheshire Dairy Company to the effect that they were receiving watered milk from a Derbyshire farmer and as a result an Inspector of this Department took samples from each of two churns on two successive days as the milk was unloaded at the Dairy Company's premises. The samples were subsequently certified by the Public Analyst as "containing extraneous water". In view of this an endeavour was made by the Inspector to take corresponding follow-up samples when the farmer deposited the milk at the collecting point in Staffordshire. However, owing to geographical and other difficulties, he was unsuccessful in obtaining the samples, although he gained sufficient knowledge to facilitate another attempt a few days later. This further attempt was made by a different Inspector using a different car, and he saw the tractor and trailer (with churns) leave the farm and was able to intercept the milk at the "collecting point". Four churns were there unloaded and the Inspector took a sample from each. Analysis by the Public Analyst proved that the churns contained 13.0; 8.2; 18.8 and 15.3 per cent respectively of extraneous water. The following day at 6-45 a.m. the Inspector visited the producer's farm and took an "appeal to cow" sample, this proved to be milk of good quality. Accordingly, eight summonses were issued—one in respect of each of the eight churns. The Magistrates fined the defendant £5 on each summons and ordered payment of £12 12s. 0d. costs—a total penalty of £52 12s. 0d.

A further case came to light when, acting on information received, an Inspector intercepted a lorry collecting three churns of milk from a farm for delivery to a Dairy Company. A sample was taken from each churn and submitted to the Public Analyst for analysis. One

sample was certified as containing 14.6 per cent of extraneous water. Accordingly, an "appeal to cow" sample of the corresponding milking was taken which was certified to be 'Genuine'. No explanation of the presence of extraneous water could be offered by the Producers of the milk, and the milk cooling system was inspected and proved free from any leak.

At the subsequent hearing the Magistrates imposed a total penalty of £65 12s. 0d.

The final case of this type concerned a complaint by a Dairy Company to the effect that a farmer was sending in milk containing added water. As a result an Inspector waited at the Dairy until the lorry arrived with the milk which included the one churn from this particular farm. A sample taken from this churn was subsequently certified as containing seven per cent of extraneous water and in view of this a corresponding "appeal to cow" sample was taken the following day from a supervised milking at the farm. This proved to be milk of good quality. At the subsequent hearing the Magistrates fined the defendant £15 and £4 4s. 6d. costs.

Only one prosecution was necessary in respect of the sale of Channel Island Milk and this concerned a routine purchase of a bottle of such milk at a shop. The milk contained only 3.1% of fat instead of the Standard of 4% required by the Regulations. No "appeal to cow" was taken in this instance as the Standard is absolute whether or not the cow is responsible for the poor quality. A summons was issued against the producer and the Magistrates granted an absolute discharge on payment of £1 12s. 0d. costs.

Regarding the perennial subject of glass in milk, there was a slight increase (from 10 to 12) in the number of incidents reported but a slight reduction (4 to 3) in the number of prosecutions for this type of offence when compared with 1956. One trader was concerned in two of these three cases and he was fined £10 in May and a further £15 and 7/6 costs in September for supplying two different schools with glass fragments in the milk.

The other trader was fined £10 in respect of a similar type of offence relating to a school which he supplied.

Apart from these 'glass' cases there was also an instance in which a bottle of milk delivered to a school contained foreign particles. The Public Analyst subsequently certified the foreign matter to be the larvae and partially developed eggs of a fly. The firm, which had several previous convictions in respect of a variety of substances found in their milk, *e.g.* chewing gum, black oily substance, grit, etc., was fined £25 and £13 costs.

Before leaving school milk mention should be made of the only instance during the year in which it was alleged that school milk contained added water. The facts came to notice following a complaint

by a teacher to his local Medical Officer of Health. The latter sent his Public Health Inspector to investigate and subsequently the three bottles were handed to an Inspector of this Department. On arrival at the County Analyst's Laboratory the milk was found to be too sour for the freezing-point test to be carried out although from his preliminary analysis the Public Analyst was satisfied that the milk was "watered". Accordingly further samples were obtained from the supplier at the time he was delivering milk to the school, but these proved to be genuine. As the supplier himself received the milk ready bottled from a wholesaler who in turn received the milk from several farmers, arrangements were made to sample the milk sent from each farmer to the wholesaler and all these samples proved to be genuine. In view of all the circumstances no legal action was possible.

Apart from school milk one case of a foreign body in milk concerned a householder who found part of a cigarette packet bearing the words "3 pints please" in the bottle of milk delivered to his house. The firm was subsequently fined £10 for this offence.

Regarding non-standard samples other than milk,—of the 823 analysed 51 were certified as not conforming to statutory requirements. This figure of non-standard samples is exceptionally high and, in fact, higher than at any time since before the War. One of the main causes of this is the large number (63) of samples of flour obtained of which no less than 15 were reported against. In this connection the County Analyst reported to the Weights and Measures, Food and Drugs Act Committee as follows:—

"On 30th September, 1956, the Flour (Composition) Regulations, 1956, came into force. During the milling of white flour the natural contents of iron, vitamin B1 (Aneurine), nicotinic acid and calcium in the wheat become concentrated in the rejected products, and the Regulations provide for the artificial replacement of these components to the flour; chalk (*creta praeparata*) and a "master mix" containing iron and the two specified vitamins must be added in prescribed quantities.

No difficulty in incorporating the combined mixture of iron and vitamins has been reported, but it is known to be difficult to mix small quantities of chalk uniformly throughout a large bulk of flour. Hence, some variation in the chalk content of samples may be anticipated and it does not necessarily imply non-conformity with the Regulations unless chalk is found to be regularly deficient or regularly in excess in the product of an individual firm. At the beginning of 1957, therefore it was recommended that a comparatively large number of informal samples of flour should be taken during the year in each of the four divisions of the County, in order to gain information of the extent of variation of the additives. In accordance with this policy, 63 samples of flour have been examined during the year. The results of analysis indicate that the official requirements in respect of iron and

vitamins are being met, but there appears to be some preponderance of samples containing an excess of chalk."

A brief summary of all non-standard samples other than milk is given below, the result of the analysis being shown in parenthesis.

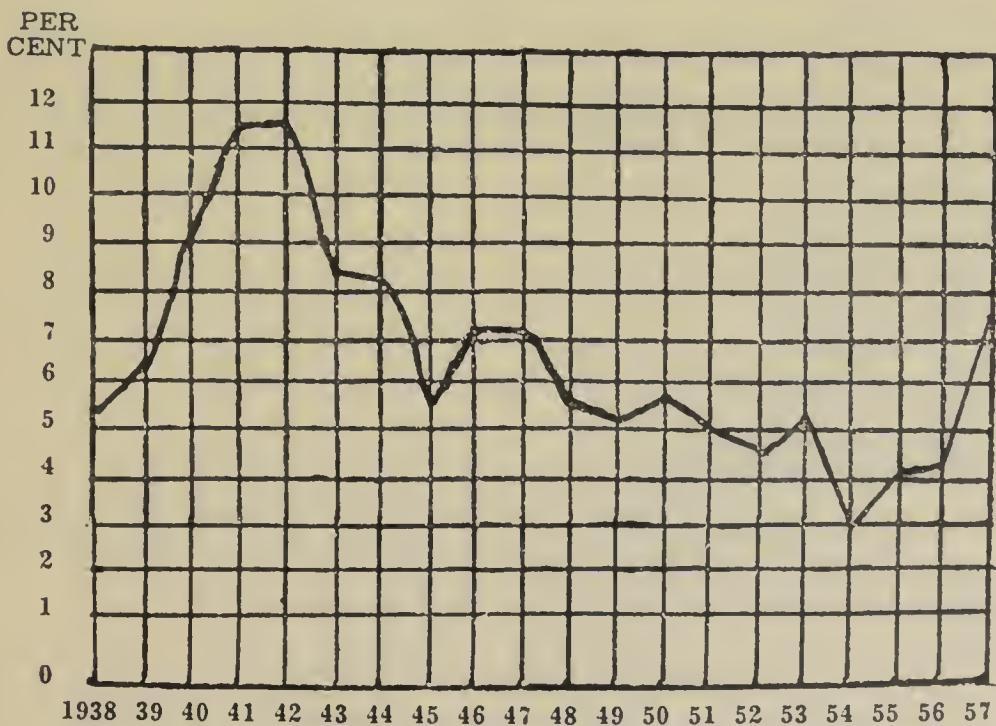

- 1 to 15 **Plain flour** (Contains an excess or deficiency of creta praeparata). See remarks above.
- 16 **Celery soup** (Incorrectly labelled in that it does not specify the ingredients in the order of the proportions in which they are used, the ingredient in the greatest proportion being specified first). Manufacturers cautioned. New label now in use.
- 17 **Bread** (contaminated with oily matter, rust and dirt). Bakers cautioned. Contamination due to a chain breaking in an improver at the bakery.
- 18 **Sulphur and Yeast tablets** (17.3% deficient in sulphur of the amount declared). Manufacturers cautioned.
- 19 **Sago, flaked** (Infested with insects and unfit for human consumption). Informal sample. See corresponding formal sample No. 21 below.
- 20 **Milk flavouring** (contained 300 parts per million Benzoic preservative). No action owing to doubt as to whether this should be classed as a flavoured syrup. Authorities are investigating similar product.
- 21 **Sago, flaked** (contaminated with dirt). Seller cautioned. Formal sample corresponding to No. 19 above.
- 22 **Buttered barm cake** (barm cake spread with margarine). Informal sample. See corresponding formal sample No. 23.
- 23 **Buttered barm cake** (barm cake spread with margarine). Formal sample re No. 22 above. Conditionally discharged on payment of £1 19s. 0d. costs.
- 24 **Cod liver oil** (deficient in Vitamin A). Seller cautioned. Deficiency due to long storage in retail shop.
- 25 **Cod liver oil** (deficient in Vitamin A). Seller cautioned. Deficiency due to long storage in retail shop.
- 26 **Table jelly** (did not conform to the official setting test). Manufacturers cautioned.
- 27 **Marmalade** (contaminated with a bristle composed of vegetable fibre and including a fragment of carbonised sugar). Manufacturers cautioned.
- 28 **Flavouring, strawberry** (flavoured syrup containing benzoic acid preservative (330 parts per million). No action.
- 29 **Pork sausage meat** (contained 190 parts per million of undeclared preservative). Seller fined £5 and £2 10s. 0d. costs.

- 30 **Cod liver oil** (deficient in vitamin A). Old stock. Seller cautioned.
- 31 **Sweet spirit of nitre** (deficient in ethyl nitrite to the extent of 45.6%). Deficiency probably due to rapidity with which ethyl nitrite decomposes. Seller cautioned.
- 32 **Mint jelly** (did not conform to the requirements of the Labelling of Food Order, 1953). Manufacturers cautioned. New label now in use.
- 33 **Pure lard** (rancid and contained an excess of free-fatty acid). Informal sample. See No. 34.
- 34 **Lard** (lard that is rancid). Further informal sample from same seller as No. 33. See corresponding formal sample No. 35.
- 35 **Lard** (lard contaminated with an excess of free fatty acid). Manufacturers cautioned.
- 36 **"Teasol"** (statement on label incorrect and misleading). Manufacturers cautioned.
- 37 **Boric ointment** (contained approximately ten times as much boric acid as described by the B.P.). Seller cautioned. (Up to 1948 the amount found in this sample was permitted by the B.P. but after 1948 the amount was reduced to one-tenth.) This sample was manufactured before 1948.
- 38 **Boric ointment** (36.6% deficient in boric acid). Manufacturers cautioned.
- 39 **Pork sausage** (contained less than 80% pork, contrary to the recommendation in the Food Standards Committee's Report to the Ministry of Agriculture, Fisheries and Food). Manufacturers cautioned.
- 40 **Pork sausage** (270 parts per million of undeclared preservative). Informal sample. See corresponding formal sample No. 41.
- 41 **Pork sausage** (280 parts per million of undeclared preservative). Fined £2 and £2 10s. 0d. costs.
- 42 **Glycerine** (contaminated with Iron from rusty stopper). Manufacturers cautioned.
- 43 **Orange squash** (20% deficient in fruit juice). Attention of manufacturers drawn to deficiency.
- 44 **Drambuie** (8.5% extraneous water or 36% under proof). Formal sample to be obtained.
- 45 **Orange squash** (20% deficient in fruit juice). Attention of manufacturers drawn to deficiency.
- 46 **Halibut liver oil capsules** (deficient in vitamin A activity to the extent of 25% of the amount declared). Manufacturers cautioned.

- 47 **Quinine compound tablets** (the label of which was misleading). Manufacturers cautioned. Label bore legend "... tablets kill flu and cold germs." County Analyst regarded this statement as misleading and not in accordance with scientific knowledge.
- 48 **Pork sausage** (18.1% deficient in meat). Manufacturers cautioned.
- 49 **Pork sausage** (28.9% deficient in meat). Manufacturers cautioned.
- 50 **Pork sausage** (contained 170 parts per million of undeclared sulphur dioxide). Fined 10/- and £2 10s. 0d. costs.
- 51 **Buttered liquorice sweets** ("Butter flavoured confectionery incorrectly labelled.") Manufacturers cautioned. Sweets should have been labelled "Butter flavoured", not "Buttered."

In concluding this Section it is interesting to note the graph below which gives the percentage variation in the total numbers of non-standard samples each year since before the War.

Whilst I have no desire to minimise the seriousness of the upward swing in the number of samples reported against I must, at the same time, state that the special concentration on flour samples is a main cause of the poor showing and not that there is a general deterioration in the quality of foodstuffs on sale.

## Section IX. Mental Health

---

### PART I. MENTAL ILLNESS

TABLE I.

The following table shows the number of people suffering from mental illness admitted to hospital by agency of the authority's officers during the period 1st January to 31st December, 1957.

HOSPITAL	Mental Treatment Act, 1930					Lunacy Act, 1890					TOTAL

## General

For the first time in the past two years, a check in the progressive increase of admissions to hospital is revealed in the foregoing statistics. A decrease of 117 cases in the Liverpool Region, offset by an increase in the Manchester Region of 82 cases, gives an overall reduction for the Administrative County of 35 cases. The subjects of Mental Health and Mental Illness have received considerable publicity during the year, notably from the Report of the Royal Commission, and from the exhibitions held in both Regional Hospital Board Areas at Macclesfield Crewe and Chester. It is a matter of importance that one of the principal recommendations of the Royal Commission—the avoidance of certification wherever possible—has been achieved in advance of impending legislation, and greater use has been made of the "Short Order" to obtain appropriate treatment, when patients have not had sufficient insight to accept Voluntary Treatment. There has also been a great development of domiciliary visitation by consultant psychiatrists at the request of the family doctor.

## Admissions

The undermentioned information, extracted from the Deva Hospital returns, conveys in retrospect (a) the nature of mental illness prevalent during the year (b) the period of hospitalization, and the prospect of a resumption of the patient's former normal life.

<i>Nature of Illness</i>	<i>Males</i>	<i>Nature of Illness</i>	<i>Females</i>
Depressive State .....	28	Depression .....	60
Endogenous Depression ..	6	Endogenous Depression .....	4
Manic—Depressive .....	3	Involutorial Depression .....	5
Involutorial Depression ..	6	Schizophrenia .....	6

Certified	13	—	8	3	1
—	—	—	—	—	—
96	17	56	13	5	5
—	—	—	—	—	—

## After-care

The numbers of cases referred to the Department for after-care visitation on discharge from hospital during the year were—Deva 79 cases, Winwick 93 cases, and Rainhill one case. Domiciliary visits have been made by Health Visitors and Authorised Officers in the Liverpool Regional Hospital Board's area. Discharged patients in the Manchester Regional Hospital Board's area have been supervised by the Hospital Psychiatric Social Workers. The implementation of the Royal Commission's recommendation at the present time, and consultation with Deva and Parkside Hospitals have already taken place.

## Records

The numbers of patients admitted from the Administrative County and receiving treatment at the respective hospitals, as extracted from the weekly reports of Authorised Officers, and the statutory returns issued by Hospital Management Committees, are as follows:—

Hospital	Patients at 31/12/57		Patients at 31/12/56		Patients at 31/12/55	
	Men	Women	Men	Women	Men	Women
Deva	381	533	362	498	339	510
Parkside	749	924	745	860	622	890
Stockport	69	83	49	42	53	43
Ashton	12	35	11	32	11	26

	<u>1,461</u>	<u>1,966</u>	<u>1,448</u>	<u>1,825</u>	<u>1,319</u>	<u>1,861</u>

## PART II. MENTAL DEFICIENCY

The following table gives particulars of the cases reported during 1957 and their disposal together with a classification of some special categories:—

	Under age 16		Aged 16 and over	
	M.	F.	M.	F.
<b>1. Particulars of Cases reported during 1957—</b>				
(a) Cases ascertained to be defectives “subject to be dealt with” Number in which action taken on reports by:—				
(i) Local Education Author- ities on children				
(1) While at school or liable to attend school	36	29	—	—
(2) On leaving special schools	2	3	2	1
(3) On leaving ordinary schools	1	—	—	1
(ii) Police or by Courts	—	—	1	—
(iii) Other sources	5	7	7	11
Total of 1 (a)	44	39	10	13
(b) Cases reported who were found to be defectives but were not regarded as “subject to be dealt with” on any ground	2	3	32	13
(c) Cases reported who were not regarded as defectives and are thus excluded from (a) or (b)	—	—	1	2
(d) Cases reported in which action was incomplete at 31st Decem- ber, 1957, and are thus excluded from (a) or (b)	7	1	—	—
Total of 1 (a) - (d) inc.	53	43	43	28

	Under age 16		Aged and over	
	M.	F.	M.	F.
<b>2. Disposal of Cases</b>				
(a) Of the cases ascertained to be defectives "subject to be dealt with" number				
(i) Placed under Statutory Supervision	43	39	5	11
(ii) Placed under Guardianship	-	-	-	-
(iii) Taken to "Places of Safety"	-	-	-	-
(iv) Admitted to Hospital	-	-	5	2
Total of 2 (a)	43	39	10	13
(b) Of the cases not ascertained to be defectives "subject to be dealt with" number				
(i) Placed under Voluntary Supervision	2	3	32	13
(ii) Action unnecessary	-	-	-	-
Total of 2 (b)	2	3	32	13
(c) Cases reported at 1 (a) or (b) above who removed from the area or died before disposal was arranged				
Total of 2 (a) - (c) inc.	46	42	42	26
<b>3 Number of Mental Defectives for whom care was arranged by the local health authority under Circular 5/52 during 1957 and admitted to—</b>				
(a) National Health Service Hospitals	5	6	5	4
(b) Elsewhere	4	3	-	-
	9	9	5	4
<b>4. Total cases on Authority's Register at 31/12/57.</b>				
(i) Under Statutory Supervision	205	156	320	298
(ii) Under Guardianship	-	-	-	-
(iii) In "Places of Safety"	4	9	-	1
(iv) In Hospitals	48	37	356	252
Total of (i) - (iv)	257	202	676	551
(v) Under Voluntary Supervision	1	8	98	57
Total of 4 (i) - (v) inc.	258	210	774	608

	Under age 16	Aged 16 and over		
	M.	F.	M.	F.
5. Classification of defectives in the Community on 31/12/57 (according to need at that date)				
(a) Cases included in 4 (i)-(iii) in need of hospital care and reported accordingly to the hospital authority:—				
(1) In urgent need of hospital care:	15	9	4	3
(i) "cot and chair" cases	7	6	1	—
(ii) ambulant low grade cases	26	15	13	10
(iii) medium grade cases	—	1	4	9
(iv) high grade cases				
Total urgent cases	48	31	22	22
(2) Not in urgent need of hospital care:—				
(i) "cot and chair" cases	4	4	1	—
(ii) ambulant low grade cases	—	—	—	—
(iii) medium grade cases	6	3	2	1
(iv) high grade cases	1	—	1	2
Total non-urgent cases	11	7	4	3
(b) Of the cases included in items 4 (i), (ii) and (v) number considered suitable for:—				
(i) occupation centre	104	94	15	17
(ii) industrial centre	—	—	—	—
(iii) home training	—	—	—	—
Total of 5 (b)	104	94	15	17
(c) Of the cases included in item 5 (b) number receiving training on 31/12/57:—				
(i) in occupation centre (including Voluntary Centres)	96	82	15	17
(ii) in industrial centre	—	—	—	—
(iii) from a home teacher in groups	—	—	—	—
(iv) From a home teacher at home (not in groups)	—	—	—	—
Total of 5 (c)	96	82	15	17

### Institutional Accommodation

During the year 1957 vacancies were found for mentally defective persons in institutions as follows :—

Arclid Hospital, Sandbach	—	—	—	—	1
Brockhall Hospital, Langho, Blackburn	—	—	—	—	6
Calderstones Hospital, Whalley, Lancs.	—	—	—	—	4
Cranage Hall Hospital, Holmes Chapel	—	—	—	—	3
Greaves Hall Hospital, Banks, Southport	—	—	—	—	5

The Manor, Great Sutton, Wirral	—	—	1
Mary Dendy Hospital, Alderley Edge	—	—	11
Royal Albert Hospital, Lancaster	—	—	6
Swinton Homes, Manchester	—	—	2

### Temporary Care

In 1957 the provision was continued of temporary care by admission to hospital for periods of up to two months during family emergencies, especially during the summer months when permanent patients are on holiday, thus providing a temporary respite for parents of children who could not at the time be permanently accommodated.

During 1957, such temporary care was provided in twenty cases. Another method of securing the same benefit has been the introduction of short stay accommodation at the Orchard Dene Hostel at Rainhill of the National Association for Mental Health where similar temporary accommodation is available, subject to contribution by the parents under the provision of the Care and After-care convalescence provisions of the National Health Service Act. Seven children were so accommodated in 1957.

The following table shows the Institutions where patients were accommodated at the end of the year under review:—

	Males		Females		Total		Total
	Under age 16	Over age 16	Under age 16	Over age 16	Under age 16	Over age 16	
Arclid Hospital, Sandbach	5	14	—	2	5	16	21
Ashton House, Birkenhead	—	—	—	3	—	3	3
Atherleigh Hospital, Leigh, Lancs.	1	—	3	—	4	—	4
Birkenhead Hospital	—	1	—	—	—	1	1
Botleys Park Hospital, Chertsey	—	—	—	1	—	1	1
Brentby Colony, Bristol	—	3	—	—	—	3	3

Newchurch Hospital, Culcheth	—	—	1	1	1	1	2
Rampton Hospital, Retford	1	8	—	3	1	11	12
Royal Albert Hospital, Lancaster	11	25	2	9	13	34	47
St. Margaret's Hospital, Birmingham	—	—	1	—	—	1	1
St. Mary's Hospital, Alton	—	—	—	1	—	1	1
St. Raphael's Hospital, Barvin Park, Herts.	—	—	1	—	—	1	1
South Ockenden Hosp., Essex	—	—	—	2	—	2	2
Stanley Hospital, Ulverston	—	—	—	1	—	1	1
Stoke Park Hospital, Bristol	—	9	—	5	—	14	14
Swinton Hospital, Manchester	4	1	4	2	8	3	11
Whitecross Homes Hospital, Warrington	3	—	6	1	9	1	10
Whittington Hall Hospital, Chesterfield	—	—	—	2	—	2	2
	52	356	46	253	98	609	707

### Places of Safety and other temporary accommodation

At the end of the year 1957, the following numbers were placed temporarily in the Institutions shown pending permanent accommodation under the Mental Deficiency Acts:—

Atherleigh Hospital	4	Olive Mount Hospital	7
Crow Wood Hospital	3	Redcourt Approved Home	8
St. Joseph's Hospital	4	Whitecross Homes	10

## **Supervision**

Male defectives in their own homes have continued to be supervised by Authorised Officers, and female defectives by Health Visitors.

## **Occupation Centres**

The County Council now has five occupation centres, at New Ferry, Altrincham, Macclesfield, Hyde and Nantwich, which provide training for ineducable children, and much appreciated help to their parents.

Full use is made of special transport, and the only defective children suitable for occupation centres who cannot attend one are those few isolated cases in rural districts where the cost of transport would be wholly disproportionate.

The following table shows the numbers of Cheshire cases on the registers of occupation centres at the end of 1957:—

### *County Occupation Centres*

<i>Name</i>			<i>Male</i>	<i>Female</i>
Altrincham	....	....	22	21
Bebington	....	....	28	18
Hyde	....	....	20	19
Macclesfield	....	....	22	16
Nantwich	....	....	13	13

### *Other Occupation Centres*

Chester	....	....	2	5
Stockport	....	....	—	3
Manchester	....	....	5	—
Warrington	....	....	1	5

The present occupation centres provide for children of school age only. Consideration has been given by the County Health Committee to the provision of occupation centre training to adults, young children and physically handicapped persons suffering from mental defect, and it has been decided as a matter of policy that the occupation centre service shall be extended gradually to cover these other categories.

New occupation centres at Eastham (to replace the present one at New Ferry) and at Northwich have been included in the programme of capital expenditure for the present year, and plans are being prepared for submission to the Ministry of Health.

Local branches of the National Spastics Society, a voluntary organisation, have set up centres at Crewe, Bollington and Sale. Children and adults suffering from severe physical handicaps attend once or more weekly at these voluntary centres. Financial contributions are to be made to these centres, based upon the attendances of children who but for their physical handicap would attend occupation centres.

(This facility did not begin until March 1958, when payment began for seven cases at Bollington).

### **Discharges from Order**

Twenty-seven cases who had been on licence from Institutions were discharged from Order during the year under review.

### **Prevention of Mental Illness**

The valuable work of the County Council's cerebral palsy teams has continued, and clinics are held at Macclesfield, Cheadle, Crewe and Northwich. The Clatterbridge Cerebral Palsy Unit is also fully utilised. In other areas near Manchester children suffering from cerebral palsy attend at the Duchess of York Hospital at Burnage. These activities undoubtedly have a preventive effect with regard to mental deficiency.

The whole subject of prevention of mental ill-health is constantly in the minds of the Council's medical and nursing staff. Even the comparatively simple procedure of re-assurance and assuaging fears and doubts in suitable cases has a decidedly beneficial effect upon mental strains and stresses and thereby has preventive value. The establishment of a County Psychological Service, working in close co-operation with the hospitals and clinics set up by the Regional Hospital Boards, will for the first time provide county children with readily obtainable diagnostic and therapeutic means in that large field of mental ill-health which does not come within the purview of mental hospitals and their associated out-patient clinics. The present staff of the Health Department cannot cope adequately with the cases in this field even when their activities are supplemented by reference to child guidance centres outside the County. Such a service can be expected to have a considerable preventive value, in addition to its value in the investigation and treatment of behaviour disorders in childhood.

### **General**

As in previous years reports on defectives and on their home conditions have been supplied to Hospital Management Committees on a variety of occasions, *e.g.* for holiday leave, licensing, and at intervals for the Statutory Visitors. Health Visitors and Authorised Officers have attended Juvenile and other Courts to give evidence in regard to alleged offences by defectives, and when necessary Medical Officers of the Department have attended to give medical evidence.

Co-operation with the Children's Department, and with the Welfare Department has continued as in previous years, and help was given to other authorities on a reciprocal basis in regard to their cases, by way of ascertainment and application for Justices' Orders.

I should like to take the opportunity of acknowledging the ready help given at all times by the Regional Hospital Boards' Bed Bureau, which has again on various occasions found prompt places for cases whose admission was an imperative urgency.

## Section X.-Domestic Help

---

Under Section 29 of the National Health Service Act, 1946, the County Council is empowered to provide a Domestic Help Service for households where such help is required owing to the presence of any person who is ill, lying in, an expectant mother, mentally defective, aged, or a child not over compulsory school age.

The service is one of those which have been devolved to Divisional Health Committees for organisation, administration, and management within the approved estimates. It is not one of the services provided free under the Act, and the Local Health Authority has adopted an appropriate payment scale.

Number of Domestic Helps employed at 31st December, 1957:—

- (a) Whole-time 23
- (b) Part-time 500

Number of cases in which Domestic Helps were provided under the Council's Scheme during the year:—

		<i>Cases included in previous column in which help began prior to 1957</i>
Maternity (including expectant mothers)	.....	354 11
Tuberculosis	.....	25 13
Chronic sick (including aged and infirm)	.....	1676 1001
Others	.....	325 46
	Total	2380 1071

## Section XI.-Home Nursing

---

Under Section 25 of the National Health Service Act, the County Council has the duty to provide a full service for nursing sick persons at home free of charge to the patient.

Details of the nurses and nurse-midwives employed by the County Council are given earlier in this report, together with their districts.

Small nursing appliances are kept by nurses for loan to their patients; large items such as special beds, wheel chairs, spinal carriages are available at the Divisional Offices. This service forms part of the County Council's arrangements under Section 28 of the Act.

The following statistics give some idea of the scope of the service and the work done:—

(a) Number of Home Nurses at 31/12/57:—	
(1) Whole-time on General Nursing .....	..... 49
(2) Part-time on General Nursing .....	..... 136
(b) Equivalent whole-time home nursing service provided in (a) (2) .....	..... 75
(c) Number of visits paid by Home Nurses, 1957 .....	..... 414,981
(d) Number of cases attended by Home Nurses, 1957 .....	..... 22,595
(e) Number of houses owned by County Council .....	..... 24
(f) Number of motor vehicles owned by County Council .....	..... 63
(g) Number of County-owned motor-assisted pedal cycles .....	..... 1
(h) Number of nurses receiving County allowance for their own cars .....	..... 92
(i) Number of telephone rentals being paid .....	..... 154

## Section XII.-Handicapped Persons

### General

Under Section 29 of the National Assistance Act, 1948, the County Council provides Welfare Services for handicapped persons, and the scheme under this heading has been made the responsibility of the County Health Committee.

The classes of handicapped persons to which the section applies are the blind, the partially sighted, the deaf and dumb, and others substantially and permanently handicapped by illness, injury, congenital deformity, or such other disability as may be prescribed.

### Blind Persons

The Council's approved scheme so made continues, with necessary amplification, the scheme carried out in previous years in accordance with the Blind Persons Acts. Its details are executed by the Blind Welfare Societies at Chester, Ashton-under-Lyne, and Macclesfield, with which appropriate financial arrangements have been made. The Welfare Services of these Societies have been extended, so far as they are applicable, to partially sighted persons.

### Certification

To ensure that no person's name is placed on the register without the certificate of a medical practitioner with special experience in ophthalmology, all applicants were examined by one of the County Ophthalmologists. Those who so wished were examined a second time under the Medical Referee Service—conducted jointly with the North Regional Association—by independent Medical Referees.

### Statistics

### *Incidence of Blindness*

During the year 1957 there were 303 forms B.D.8 received for the County. These were classified as follows:—

Registered as Blind.....	.....	.....	166
Registered as Partially Sighted .....	.....	.....	112
Not registered .....	.....	.....	25

### *Follow up:*

i) Number of cases registered during 1957 in respect of which para. 7 (c) of Forms B.D.8 recommended:—	Cause of Disability			
	Cataract	Glaucoma	Retrorenal Fibroplasia	Others
(a) No treatment	39	12	—	83
(b) Treatment (medical surgical or optical)	54	21	—	69
(ii) Number of cases at (i) (b) above which on follow-up action have received treatment	20	13	—	34

### *Ophthalmia Neonatorum*

(i) Total number of cases notified during the year	2
(ii) Number of cases in which:—	
(a) Vision lost	Nil
(b) Vision impaired	Nil
(c) Treatment continuing at end of year	Nil

### *Workshop Employees*

Annual grants were continued on the usual principles to recognised Workshops for Cheshire employees. A "minimum wage" principle has been adopted for certain workers, their income being made up to a nationally agreed fixed amount. On this principle there were 5 male and 3 female employees at Chester, 3 male employees at Macclesfield, 1 male employee at Oldham, 1 male employee at Stoke-on-Trent, 2 males and 1 female at Henshaws, 1 male employee at Warrington, 1 male employee at Stockport and 2 male employees at Liverpool at the end of 1957.

### *Home Workers*

The three voluntary societies arranged for the employment at home of those capable of it. Augmentation in accordance with the National Scheme was given by the Council to all County approved Workers, who numbered 14 at the end of 1957.

### *Open Industry*

During 1957, grants on the Home Workers scale were made to two blind persons employed in open industry.

### *Rehabilitation*

Two females were maintained for varying periods during 1957 at the National Institutes Rehabilitation Centre, Oldbury Grange, Bridgnorth.

### *National Library for the Blind*

Grant and augmentation were made in 1957 to the National Library for the Blind on behalf of 2 Cheshire Home Workers who are Blind Copyists for its northern branch, apart from the usual annual grant for general services, which are used by over 100 Cheshire residents.

### *Other Services*

The usual annual grants were continued in 1957 to the National Institute for the Blind and the North Regional Association for their respective national and regional services. An additional grant was paid to the National Institute in respect of its services in placing blind persons in open industry. Five persons were newly placed during 1957, two persons changed employment and a total of 560 visits was made by the Institute's Officers in connexion with this service.

Grants are made when necessary towards training blind persons to work with guide dogs.

### *Wireless Certificates*

173 Certificates entitling the recipients to a free wireless licence were issued in 1957 to applicants on the register.

### **Deaf Persons**

The County is fully covered by voluntary societies for the welfare of the deaf, and financial grants are made by the County Council to these societies, which act as authorised agents for the provision of advice and help, when desired, for the establishment of social centres, and for outings and other recreational activities. A grant is also paid to the North Regional Association for the Deaf in respect of its statistical, co-ordinating, and educational work. The numbers of Cheshire deaf persons on the registers of the Societies are approximately as follows:—

Chester .....	.....	.....	.....	.....	154
Manchester .....	.....	.....	.....	.....	168
Liverpool .....	.....	.....	.....	.....	44
St. Vincent's .....	.....	.....	.....	.....	4
Warrington .....	.....	.....	.....	.....	25
					—
			Total		395

## Other Handicapped Persons

### General

The registers of handicapped persons other than the blind, deaf, and dumb are kept by Divisional Medical Officers. They are limited to persons who wish to receive benefits under the approved scheme. General advice is given on overcoming their handicaps, and on how to obtain such help as is available, either under this scheme or under the hospital, local authority, or other aspects of the National Health Service. One example of help under this scheme is adaptation of premises, inside or outside, to facilitate use of an invalid chair or carriage. During 1957 the County Health Committee approved grants towards the cost of adaptations at the homes of sixteen handicapped persons to help them overcome their difficulties. Assistance in handicrafts is given when possible, with the co-operation of voluntary bodies. The most prominent example of the Council's help to handicapped persons is, of course, Wrenbury Hall Colony (see Section V).

### Statistics

The numbers of persons on the above registers were as follows at 31/12/57:—

M of L class.	Definition	Children under 16 M. F.	No. on Register					
			Aged 16		Aged 65		Total	
			— 64	& over	M.	F.		
A/E	Amputation	3			13	11	5	41
F	Arthritis and Rheumatism	—	4		17	47	18	95
G	Congenital malformations and deformities	27	22		28	55	—	171
H/L	Diseases of the digestive and genito-urinary systems; of the heart or circulatory system; of the respiratory system (other than tuber- culosis) and of the skin	—	42	35	64	90	25	74
Q/T	Injuries of the head, face, neck, thorax, abdomen, pel- vis or trunk. Injuries or diseases (other than tuber- culosis) of the upper and lower limbs and of the spine		12	10	33	30	3	10
V	Organic nervous diseases— epilepsy, disseminated scler- osis, poliomyelitis, hemi- plegia, sciatica, etc.	—	56	44	72	125	4	17
U/W	Neuroses, psychoses and other nervous and mental disorders not included in V	3	1	10	47	—	7	68
X	Tuberculosis (respiratory)	16	19	402	321	34	3	795
Y	Tuberculosis (non-respir- atory)	—	19	16	51	53	2	3
Z	Diseases and injuries not specified above	—	18	13	19	34	7	144
	Totals		196	164	709	813	98	225
								2205

### *Epileptics and Spastics*

The number of persons on the Registers are not necessarily the total number of persons so handicapped. In regard to the above two important classes, the following are estimated totals:—

(a) Epileptics		
(i) Children under 16	140	
(ii) Adults	84	
(b) Spastics		
(i) Children under 16	220	
(ii) Adults	33	

Care is taken to ensure that, so far as possible, epileptic and spastic persons receive necessary treatment, education and accommodation and co-ordination is effected when necessary with the residential welfare and the hospital services.

### **Meals on Wheels**

The following information has been supplied by W.V.S. County Office, indicating the scope of the work done in providing meals in the home for old people.

<i>Centre</i>	<i>No. of Recipients*</i>	<i>Meals Served per month*</i>
1 Alderley Edge .....	20	133
2 Altrincham .....	56	263
3 Bebington .....	37	393
4 Bredbury & Romiley .....	21	232
5 Crewe .....	24	387
6 Hale .....	23	111
7 Hazel Grove .....	17	270
8 Hoylake .....	31	249
9 Hyde .....	98	500
10 Marple .....	19	132
11 Nantwich R.D. ....	10	40
12 Nantwich U.D. ....	20	87
13 Northwich .....	26	153
14 Poynton .....	14	105
15 Sale .....	38	305
16 Winsford .....	12	92
17 Whitegate .....	9	72
<hr/>		
Totals		3,524
<hr/>		

Hoylake and Altrincham have also luncheon clubs which serve lunches and teas to old people who are fit and wish to avail themselves of this Service.

\* The actual month was June, 1958.

## Section XIII. Water Supplies Sewerage and Sewage Disposal

---

### Regrouping of Water Undertakings

During the year discussions continued among the various water undertakers in the County with a view to voluntary amalgamations and transfers, as a result of Circular 52/56 issued by the Minister of Housing and Local Government in September, 1956. This Circular urged all water undertakings in the country to accelerate the process of re-grouping so as to secure the most effective use of the water resources of the country and to provide a reliable service with economy in cost.

On 1st April, 1957, the Longdendale U.D.C.'s water undertaking was transferred to Manchester Corporation as a result of agreement reached between the two authorities after an approach had been made to Manchester by the Longdendale Council. It is known that negotiations for several other transfers and amalgamations were reaching an advanced stage at the end of 1957.

### Scheme of Financial Assistance

Water Supply, Sewerage and Sewage disposal schemes of authorities in the administrative county can be assisted financially in two ways. Under the Rural Water Supplies and Sewerage Acts, 1944 and 1951, approved schemes for rural localities may qualify for a contribution both from the Exchequer and from the County Council, while schemes for other areas may qualify for a grant under the County Council's scheme of Financial Assistance which operates under provisions of the Public Health Act, 1936.

In the last financial year for which figures are at present available, i.e. the year ended 31st March, 1957, a total sum of approximately £34,500 was contributed by the County Council towards schemes of District Councils which qualified in one of these ways.

During the year under review, schemes of water supply estimated to cost £460,412 and schemes of sewerage and sewage disposal estimated to cost £763,081 were considered by the Department, and the following gives brief outlines of these schemes and the action taken thereon.

### Water Supplies

**Congleton Borough Council**— Water main extension in Holmes Chapel Road, Congleton.

This scheme, estimated to cost £2,150, was to provide an improved supply of water to the West Heath Hospital and also to provide an adequate supply of water for housing development in the area. The scheme was recommended for approval.

**Marple Urban District Council**—Water Supply Improvement Scheme for Mellor.

This scheme provided for the scraping of all existing 3" mains, the replacement of 1" pipes by 3" mains and several minor works of improvement. The scheme was estimated to cost £6,277 and was recommended for approval.

**Tarvin Rural District Council**—Water Supply Improvement Scheme for Malpas.

This scheme was estimated to cost £4,007. It provided for a new tapping on the Vyrnwy Aqueduct and the laying of new mains to improve the supply in the village area and also to give improved supplies to the southern area of the Rural District. The scheme was recommended for approval.

Water Supply Extension Scheme at Tilston, at an estimated cost of £1,398. This provided for the laying of 794 yards of water mains to serve thirteen properties. The scheme was recommended for approval.

Water Supply Scheme for the Parishes of Bruen Stapleford, Burton, Foulk Stapleford and Huxley, at an estimated cost of £22,660. This scheme provided for the laying of a total of 10,815 yards of water main, to give a complete circuit of mains serving these areas and linking up with the existing mains network at Bruen Stapleford, and will provide a piped water supply to 42 houses, 32 farms and smallholdings and 3 other properties. The scheme was recommended for approval.

**Hyde Borough Council**—A scheme for the complete re-organisation of the water supply system of the Borough, at an estimated cost of £423,920. For some years the need for an all-round revision of the water supply system had been felt, and the need to provide for a large overspill population from Manchester at the Hattersley overspill site had made this revision more urgent. The scheme provides for the replacement of three existing points of supply by a single intake from the Manchester Corporation Waterwork's Longdendale Aqueduct; the provision of complete treatment works; the abandonment of one reservoir, improvements to others, and the provision of two new reservoirs and a high level tank; the provision of a new main pumping station and a small subsidiary pumping station; the provision of approximately  $8\frac{1}{4}$  miles of trunk mains, both gravity and rising; and the provision of about  $1\frac{1}{2}$  miles of new distribution mains. A grant of approximately £133,296 was anticipated towards the cost of the scheme from

the Exchequer under the Town Development Act in respect of the Overspill Scheme. The scheme was recommended for approval.

### Sewerage and Sewage Disposal

**Northwich Rural District Council**—Sewerage and Sewage Disposal Scheme for the Parish of Acton.

The scheme as submitted was estimated to cost £14,565 and was, in effect, the first phase of a comprehensive scheme for the village.

It provided for the laying of sewers to serve the area south of Acton Bridge Station, with sewage disposal works to be constructed large enough to serve the whole village. The scheme as submitted would have provided drainage facilities for 25 properties out of a total of approximately 132 in the whole village.

It was suggested to the Northwich R.D.C. that if only 25 properties were to be drained to start with, the disposal works should also be limited in capacity in the first instance to deal with this development only. The R.D.C. were unwilling to do this as, of course, the ultimate cost of the works would be increased. They were therefore informed that if the scheme for the whole village was submitted, it would be given favourable consideration with a view to approval for grant purposes. The R.D.C. have since submitted the whole scheme and approval has been given.

Sewerage and Sewage Disposal scheme for the parish of Comberbach, at an estimated cost of £28,418. This scheme provided for the laying of new sewers to serve areas at present unsewered, replacement of some existing defective sewers in the Marbury Road area, and the construction of new Disposal Works. In Comberbach 180 existing properties would be served, with the elimination of 45 pail closets, while 16 properties in the adjacent parish of Antrobus in the Runcorn Rural District could also be connected to the sewers. This scheme was recommended for approval.

Sewerage and Sewage Disposal Scheme for the Parish of Lach Dennis, at an estimated cost of £5,310.

This scheme was to provide sewers to serve the village and to extend the existing Council House sewage installation to enable it to deal with the increased flow. Facilities would be provided for 30 existing properties, as well as future development, and contributions amounting to £350 had been offered by owners of private properties who would be served by the scheme.

It was felt that the existing Council House installation was badly sited in relation to the village scheme, the outfall for effluent was unsatisfactory, and that the amenities would be improved if the works were moved to a site on the west of the village. It was accordingly recommended that the scheme should be referred back to the R.D.C. for further consideration.

Sewerage and Sewage Disposal Scheme for Little Leigh, at an estimated cost of £5,161. The scheme provided for the laying of sewers in the village area, draining to an existing Council House sewage disposal works in Brakeley Lane, the extension of this installation to deal with the additional flow, and the provision of a separate installation for the treatment of sewage from six houses known as 'The New Houses' which cannot be economically drained into any existing works.

If this scheme had been carried out, there would have been a total of five sewage disposal works in the parish of Little Leigh. Moreover, it appeared possible to gravitate the sewage from Little Leigh village to the Barnton sewerage system, pick up en route certain properties not dealt with by the scheme as submitted, and at the same time eliminate two sewage works. It was therefore recommended that the scheme should be referred back to the R.D.C. so that these possibilities could be investigated. This was done, and a scheme on the lines suggested has since been submitted to the County Council and will be dealt with in the report for 1958.

**Runcorn Rural District Council**—Sewerage and Sewage Disposal Scheme for the village of Kingsley, at an estimated cost of £55,050. This was a modified scheme prepared at the suggestion of the Ministry of Housing and Local Government to replace a combined scheme for Kingsley and Norley. The scheme serves approximately 217 houses (including 34 Council Houses), three schools, and 19 other properties. Approximately half the houses are served by pail closets, while pollution of ditches and watercourses occurs from septic tank and other discharges. The scheme was recommended for approval.

**Congleton Rural District Council**—Storm water relief sewer for the parish of Church Hulme at an estimated cost of £1,328. This was to replace a defective storm water overflow sewer running from Knutsford Road, Holmes Chapel, to the River Dane, by a new 12" sewer, to remedy flooding of the land in times of storm. The scheme was recommended for approval.

**Bebington Borough Council**—Storm Water Relief Scheme for the Croft Avenue/Croft Lane area of Bromborough at an estimated cost of £2,900. The scheme provided for the laying of a new 18" surface water sewer through land on the south side of Croft Avenue connecting to an existing 18" sewer which discharges into the Dibbinsdale Brook. The scheme was recommended for approval.

**Bredbury and Romiley Urban District Council**—Sewerage and sewage disposal scheme for the village of Compstall at an estimated cost of £15,350.

This scheme provided for the construction of a sewerage system for the village, draining to a pumping station, from which the sewage will

be pumped to the head of the Romiley Sewerage System which drains to the main disposal works of the Urban District Council at Bredbury. The scheme was recommended for approval.

**Hale Urban District Council**—Sewerage Scheme for the High Elm Road area of Hale at an estimated cost of £1,550.

This provided for the laying of an estate sewer at a greater depth than would otherwise be necessary, so that the sewer could take sewerage from 19 other houses at present drained to septic tanks, in addition to the housing development for which it was originally intended by the developer. A contribution of £750 was to be made by the estate developer towards the cost of the scheme. The scheme was recommended for approval.

**Northwich Rural District Council**—Sewerage scheme for part of the parish of Delamere at an estimated cost (in 1954) of £5,150.

This scheme, submitted in outline only, was to provide sewerage facilities for 47 existing properties in the Chester Road area at the western end of Delamere. The sewers will drain into the sewerage system to be provided by the Tarvin R.D.C. in the adjacent Kelsall area, and it will not be possible to proceed with the scheme until the main Kelsall scheme has been carried out.

The scheme was recommended for approval in principle, subject to the submission of a detailed scheme together with an up-to-date estimate of cost, at a later date.

**Hale Urban District Council**—Sewage Disposal Scheme, at an estimated cost of £95,450.

This was an outline scheme for the extension of the present disposal works which are of the activated sludge type and were reconstructed in 1926 with a capacity for a population of 9,000. At present the flow from a population of 12,220 drains to the works, which are seriously overloaded, and considerable flows pass to the river after receiving settlement only. The proposed extensions are designed to provide a modern works, operating on activated sludge principles, and with a capacity for an ultimate population of 15,000. The scheme was recommended for approval in principle, subject to full details being submitted when these are available.

**Hyde Borough Council**—In addition to the major water supply scheme dealt with in the previous section, the Hyde Council submitted the following sewerage and sewage disposal schemes, the need for which had again been precipitated by the Manchester Overspill proposals. Together these schemes comprise the major reconstruction and reorganisation of the sewerage, sewage disposal and water supply services of the Borough.

- (i) A main sewer diversion scheme at an estimated cost of £37,397 necessitated by the collapse of a section of an existing main sewer. (This was actually a part of the main sewerage scheme which had to be proceeded with immediately as an emergency measure).
- (ii) A main sewer reconstruction scheme at an estimated cost of £259,279, the present system being some 80 years old and of insufficient capacity to deal satisfactorily with the present and future population, part of which will result from overspill development.
- (iii) A scheme for the reconstruction of the existing sewage disposal works at an estimated cost of £236,173. The present works were constructed about 50 years ago, and now require major works of improvement and extension to be capable of satisfactorily treating the flow from the present and estimated future population draining thereto.

The Borough Council anticipate grants from the Exchequer under the Town Development Act, amounting to 50% of the cost of sewerage, and estimated at £84,500 on the sewage disposal scheme, while Manchester Corporation are expected to contribute approximately £16,000 towards the cost of sewerage in respect of the Hattersley Overspill site.

These schemes were recommended for approval.

### **Ministry of Housing and Local Government Inquiries and Investigations**

During the year Inspectors of the Ministry held Inquiries or Investigations into the following schemes and on each occasion the Department was represented by the County Health Inspector:—

July 9th	Wilmslow U.D.C.	Wilmslow North Sewerage Scheme.
July 10th	Runcorn R.D.C.	Frodsham Sewerage Scheme.
Oct. 1st	Tarvin R.D.C.	Malpas Water Scheme.
Oct. 9th and 10th	Hyde M.B.C.	Main Sewerage and Sewage Disposal Schemes.
Nov. 29th	Congleton R.D.C.	Goostrey Sewerage and Sewage Disposal Scheme.
